Subject: Re: Hi Nikki, Quick Question?

Hi Nikki,

Do you have 10 minute over the next couple of days to discuss how you could use WeLink's social media threat intelligence platform?

Happy to accommodate the time that works best for you.

Thanks,
Jericho Nicolas

Hi Nikki,

At the most recent IACP the importance of social media monitoring for law enforcement was highlighted. This is why I am reaching out to you.

I work for a company called [WeLink](#) and we provide location based social data intelligence. Our technology helps police departments drive value from social media chatter by easily filtering through the massive amounts of social data being produced within a jurisdiction.

With [WeLink](#), law enforcement agencies can:

- Identify and target potential risks and threats
- Investigate crimes; find criminals and witnesses
- Engage and communicate with local residents
- Ensure the stability, safety and security of neighborhoods and communities

Additionally you can read more about how [WeLink helps law enforcement fight crime here.](#)

Is there a day / time that you are available for a demo? Or if there is someone else I should be talking to about this can you connect me with them?

Thanks,
Jericho Nicolas
