

**Consideration of Higher Education Excellence Enhancement Program
Panel Recommendations**

During the 2003 Legislative Session, the General Assembly passed Act. 24, creating the Higher Education Excellence Enhancement Program. At the April Commission meeting, the proposed regulations for that program were approved. Those proposed regulations are currently proceeding through the Legislative approval process. In an effort to expedite the implementation of that program, the Commission staff has convened the review panel called for in the regulations process.

The panel will be meeting on Thursday April 29, 2004 to develop its recommendations. The panel will be considering a total of seven proposals received from five institutions. The relative merits of each proposal will be considered in developing recommendations to be presented to the Committee for consideration. The recommendations will be distributed to Committee and Commission members upon completion, and also posted on the Commission's webpage for public review.

The panel's recommendations will be presented to the Committee and Commission for consideration during their respective May 6, 2004 meetings. Any action by the Commission will be contingent upon final approval of the proposed regulations by the General Assembly, if such action has not occurred prior to the Commission meeting.
