Request for Help  
Re: Social Security Disability Case  
# 247-29-7352

My name is Doreen in Baykar.  
I am waiting a hope you maybe able to  
help me. On May 31, 2013 I applied for  
Social Security Disability. In May 2014  
I received a letter telling me I was denied.  
On June 4, 2014 I filed an appeal. I was  
told my appeal could take 12 to 18 months  
to go before a judge which would be around  
June to September of 2015. It's now  
December 2015 and I still have not had  
my court date. Since I have applied  
for disability, my condition has gotten  
worse. I am unable to pick up and  
hold dishes, glasses, pots, pans and  
most things with my left hand. I often  
lose my balance and can not stand  
for long periods of time. I am on several  
medications due to many health conditions.  
I suffer from diabetes, high blood pressure,  
depression and neuropathy. I get dizzy  
often and feel as though I may pass out.  
Ito been 2 1/2 years since I applied  
for disability and have not been able  
to work and have no income. I have  
to rely on friends and family to help  
me get my medicine. My husband  
has allowed me to stay in his camper

in this entire time. He also provides  
a cell phone for me to use. He also provides  
a car for me to use.  
I have no health insurance because  
I can't work. I have tried to get China  
care and again because I have no means  
I can not get it. I am told I should  
be able to get Medicaid, because I have  
no dependents and my disability has  
not been approved I do not qualify.  
Any help you can offer would greatly be  
appreciated. I am sorry I am wrong  
in waiting you, but I don't know any  
other option. Thank you very much for  
your time and help.
