---

Ben,

I need some more information on your waiver request. I have been instructing the COG's and AAA's to review the client assessments, scores, and client selection to assure those served are at risk for Medicaid enrollment or nursing home placement. All I did with the PI was document the discussions of the past year. Someone with a -0- nutrition risk score does not fit either of the two categories. We cannot expend funds on a nutrition program serving seniors with no nutrition risk.

Thanks.

Tony

Good morning Tony,

Hope you had a nice weekend.

I'd like to request a three month waiver for the Policy Directive that is to be effective on June 1, 2013. I understand that the LG97c report has been fixed and enhanced and works well with the new assessment. I believe that this will give us adequate time to implement the new policy.

Thank you for your consideration.

Ben
