Knowing how to respond to a threat is a tremendous challenge. After a violent incident, it is not uncommon to find that many different people were aware of clues that an attack was being planned. Yet, without the proper mechanism to gather information and assess the situation, prevention is nearly impossible. This webinar provides a communication and decision-making model to help businesses, schools, organizations and communities become proactive in their management of threats. Strategies to help you identify, assess, and manage individuals who make threats will be explored.
