

Mar 19 2016

Dear Governor ~~Wiley~~ Haley
hope you're doing fine.
I am writing to you about a
very serious problem that just started
with February electric bill. The problem is
the way they changed the way they charge
everyone for electricity. it used to be
for over forty year for me
11¢ per Kwh total which averaged out to

80⁰⁰ to 160⁰⁰ power bill for me depending
on the weather which is high enough for
someone like me on a limited budget.

but here's the kicker the new charge is
only 5¢ per Kwh for all the time except,
they have peak hours \downarrow Winter 6-9 AM
the coldest time of day, when everyone is getting
up work, school, cooking & the heater going.
& Summer peak hrs 4-7 pm the hottest part
of day getting home from work, school, blasting
the AC, cooking etc.

I used on^w 1200 Kwh in February = 60⁰⁰
but they charge the 1 hour of the month that
you us the most electric mine was a cold Feb
6 8-9 AM. I used 14 Kwh for only 14 Kwh I
was charged & everyone that has MCEC
12⁰⁰ per 1 Kwh = 168⁰⁰ my power bill
the cheapest of the year was 230⁰⁰ last year
the same month was ^{over} 1900 Kwh bill was only
208⁰⁰

Mid caroling Elec coop

over 1900 Kwh last year 208⁰⁰
this year new way of charging
1200 Kwh 240⁰⁰

I can only imagine when summer gets here is going to be 400⁰⁰ to 500⁰⁰ or more a month. This is an outrage I won't be able to pay these kind of power bills, as will thousands of other people on a tight budget. We already freeze in the house in winter & burn up in summer trying all we can to save. To no avail with this kind of charges.

this is affecting everyone who has Electricity with MCEC & other power companys possibly all in the future.

This is very important & needs to have something done about this ASAP before everyone has their power turned off because they can't afford these charges.

This is why I'm writing to you.
I know you can get things done like you have in the past. This ~~is~~ needs immediate attention. Thanks

Cordially William Stratton
hope to hear from you or MCEC soon
