

- PalmettoINSITU's experience, efficiency, and ethics save critical time and use technology that lowers your overall foundation design costs •
- Our site-specific seismic data better defines soils' responses, which better define future soil behavior, in turn mitigating various soil risks •
- PalmettoINSITU's tooling and technology minimize human error and replace "garbage in / garbage out" with accurate, repeatable, high-quality data that better detects potential risks in your soil — such as liquefiable sands and highly compressible clays •

PalmettoINSITU

Geotechnical Exploration

15 yrs exp., 12.5 w/ S&ME Engineering
 MS in IT, BS in CIS, AS in Civil Engineering
 Bonded & very well insured, 2% Net 10 / Net 30
 Projects include Boeing, Google, Fed & State Gov
