Investing in South Carolina

A business-friendly environment and a skilled workforce
help make South Carolina a perfect place for Impresa
to pursue its long-term strategy of on-going investment in
its customers and increased vertical integration.

"The decision to expand to South Carolina was definitely enhanced by the business-friendly orientation of the state, Berkeley County and City of Goose Creek. With the cooperation of state and local officials, we achieved our goal of eastward expansion, and advanced our strategic objectives of continual investment in our customers and increased vertical integration."

– Impresa Aerospace, LLC Chief Executive Officer, Scott Smith

An Impressive History. An Exciting Future.

Impresa Aerospace has been a premium supplier to the aerospace industry for over a half-century. The Company's latest expansion brings diversified capabilities and the precision of aerospace manufacturing to a South Carolina operation with tremendous potential in a variety of industries.

About Impresa

In addition to the new South Carolina facility, Impresa operates a 100,000 square foot Gardena, California plant, and a 40,000 square foot plant in Wichita, Kansas—employing a staff of over 300. Impresa provides a comprehensive array of engineering, manufacturing and assembly services, and is a trusted supplier to OEMs, Tier 1 and Tier 2 customers in the aerospace industry. The company has a reputation for high-quality, competitively-priced precision sheet metal parts, CNC-machined components and assemblies. Impresa has developed relationships with major national and international corporations in aerospace as well as other industries that require similar service and precision. The company boasts major contracts with *Boeing Commercial & Defense, Spirit Aerosystems, Northrop Grumman, Sikorsky, Lockheed Martin, Goodrich and Gulfstream*, to name a few.

Notable commercial programs include:

Boeing 787, 777, 747 and 737 Airbus A380 Gulfstream G550 and G650

Significant defense-related programs include:

AH-64 Apache Helicopter, C-17 Globemaster Transport
F-18 Hornet multirole combat jet, F-35 Lightning joint strike fighter
and UH-60 Black Hawk helicopter

About the South Carolina Operation

The new South Carolina operation gives Impresa a manufacturing position on the U.S. East Coast, complimenting the company's Southern California and Kansas operations. Located in the heart of an emerging international aerospace and aviation hub, the Goose Creek facility also brings valuable diversification to the company.

The new Goose Creek facility

serves several industries including energy, automotive, and aerospace.

It resides on 7.5 acres just outside the city of Charleston,
features 40,000 square feet of manufacturing capacity,
boasts an array of CNC milling and turning machines,
including 5 and 7-axis multitasking technologies

Impresa's multi-million dollar South Carolina investment will include facility upgrades, and the hiring and training of approximately 100 skilled technicians, administrative and management personnel in the coming years.
