Catherine & Danny,

Hope you are doing well and enjoying your summer. Lots going on energy-wise in SC from what we can tell. While much of this is focused on supply, we wanted to share some encouraging and positive information on the demand side of the equation.

Attached please find materials on LEED that may be of economic interest. Good resources here on the market and specifically the market within South Carolina.

While LEED is a significant part of USGBC, our core focus (above all else) is the true advancement of building efficiency and therefore reduction in OpEx through technology and systems installations.

We look forward to hearing back from you and being a resource as appropriate.

Thanks, Catherine

Brandon Peck
