Subject: RE: iPhone

I have plugged in – I am good for today. But yesterday I worked from home and couldn't access the network. I wanted to fix this for when I need to work from home. I didn't want to run into the problem again.

Thanks!
Richele

You can plug into the network cables set up on the table and be able to get your drives. Chris is on his way over to help Rebecca, he'll show you.

Richele, I just forwarded your email to my director Jim Remsey to see if he can push it to your phone

Berkley,

Hope you are doing well! I tried to put the SafeNet Mobile Pass on my phone and it hasn't downloaded. Tried several times last week. I spoke with Doug Reynolds at DOA and he couldn't help. I seem to remember you saying that sometimes it has issues? Could you help? I am in Wade Hampton today in the Governor's conference room as they are putting carpet in our office this week. I am not sure where you are, but I can run by since we have a roomful of displaced people working at the conference table. J

Richele, I need for you to turn your new iPhone off if it isn't already off and then power it back on, when it comes up it should be configured with your 803-231-9763 number.

Thanks,
