Cool. I wonder now if might want to change "cynical ploy" to "back door" attempt

Obamacare advocates continue to find inventive new ways to try to sneak-in a Medicaid expansion. Last year, it was by attaching a proviso to the Department of Health and Human Services' budget, which the House of Representatives joined me in overwhelmingly rejecting. This year, their plan is to create an "Alternative Health Study Committee" that has been carefully designed to ensure – after months of additional discussion analyzing how other states were able to implement Medicaid expansions by rebranding it under another name – the Committee will recommend that we fully implement Obamacare.

I believe that South Carolina can provide necessary care to the truly needy without resorting to the massive expansion of an open-ended federal entitlement program by continuing to pursue the Healthy Outcomes Initiatives approved and funded by the legislature last year and again this year. In addition, there is no practical way that any analysis of the effects of Medicaid expansion could meaningfully be accomplished when these states will have less than six months of available data (or less) and in many cases have not even received federal approval to even implement their so-called alternatives.

Please defeat this cynical ploy to implement Obamacare by sustaining my veto.
