## South Carolina State Parks

at 19:00:01 on 5/15/2018 UTC

Sugarcane (*Saccharum officinarum*) is sprouting in the garden at Charles Towne Landing State Historic Site – in the same spot where English colonists planted it in the 1670s! The Carolina colony, however, never became a sugar producer because the winters proved too cold. Stop by the garden and chart the cane's progress – its purple stem should be visible soon.

**Richie Canaday** My grandparents grew sugar cane. They had a Cane Mill and squeezed out the juice and boiled it in a giant pot out doors . Good memories.
