I am writing as an educator to ask you to consider the recommendations made by Jim Rex to continue funding public education. Our district has already seen drastic cuts that have impacted the quality of instruction and the loss of jobs. I returned to education after a 10 year absence because of a job loss due to downsizing in the private sector. I hold my breath each time we receive an e-mail from the district office as I fear that I will also be cut from this position since I am in a related arts area. I know you have an impossible task in making budget cuts, but please remember that our future lies in the education of our children. Thank you for the work that you do on behalf of our district.
