Integrating Behavioral Health

Hi Tony,

In 2015, President Obama challenged the healthcare industry to tackle opioid abuse.

Whether he knew it or not, some healthcare organizations were already underway with their own integrated models of behavioral health to help support members in need of pain management.

Join us **April 26-27** at the Hyatt Regency Pier Sixty-Six in **Fort Lauderdale** for **Integrating Behavioral Health** to hear how one health plan and network have worked to conquer this rising trend.

The **Oregon Pain Management Commission** will be sharing their experiences in addressing opioid management. From inception to results, this start-to-finish case study will highlight some of the steps you'll need to take in order to support prescribers and help prevent abuse in your member base using an integrated model. You'll be surprised to hear some of the unforeseen obstacles the Oregon Pain Management Commission faced in creating new programs to curb abuse.

Hear case studies like this and more at **Integrating Behavioral Health**, a two-day interactive event focused on building new models to care for members with complex needs! Register today!
