

January 11, 2017

The Honorable Nikki R. Haley
Office of the Governor
1205 Pendleton Street
Columbia, South Carolina 29201

Dear Governor Haley:

Since you will soon be going up for confirmation for your new position at the United Nations, I thought I better get this letter off to you and tell you how very pleased I have been living in South Carolina during the period when you are the Governor of the State.

I moved down here from northern Virginia when I retired, and was here during part of the time when Governor Sanford was in office. I must tell you that, as far as I am concerned, there is no comparison between the two of you. You far, far outshine anything he tried to do. Not only do you outshine him, you far exceed the expectations he seemed to have.

As far as any of the Governors of Virginia, Maryland, and Pennsylvania during my lifetime, they do not hold a candle to the GREAT job you have done. And, since the news people tend to make such a big deal of the men in this country who hold political jobs, they should pay more attention to this particular WOMAN and the fantastic job she has done during her time in the Governor's mansion.

There is just no way that I can explain how impressed I have been with the way that you have handled situations and I have a number of years of working for top government officials on which to base that statement. You far outshined the Governor of North Carolina during the hurricane aftermath. You are always considerate of your staff and what they have to say, whereas the Governor of North Carolina wanted all of the attention on himself.

I wish you all the best in the new position. If Congress doesn't approve you, it will be this country's loss. I hope and pray that they are smart enough to have you dealing with so many countries because you will certainly outdo all the men you will have to work with. I'm just sorry that you were not offered the position of Secretary of State because, in that position, I think you would have done an even greater job for this country.

I will be sending my prayers to heaven that they will protect and advise you to the nth degree and I have no doubt that they will. You have already shown how much you are in their care.

Sincerely,

Ursula Rozsa
