Subject: Fw: New Ideas for South Carolina State to get GRANTS to protect Citizens

North Carolina is taking over hemp when they legalize next term or maybe today and Greenville is building a 100 Million dollar complex to do the hemp fibers for hospitals. I have tried to get South Carolina STATE to use the NASA contract to improve this technology! We need to grow and manufacture for our Citizens! We are losing Billions and N.C. has a hemp machine that separates fibers for Ford Car manufacturing right now. Foreign Corporations are moving in and taking our opportunities !!
