Subject: Script for Hurricane Season PSA

Hank already looked over it. Let me know if yall have any edits! There would be two graphics: One with the list of tips and one with the list of SCDMV offices. I am also going to try to pick up one of the guides tonight to use as a prop.

Hello...My name is Kevin Bryant and I am proud to serve as your Lieutenant Governor.

The 2017 Atlantic hurricane season has officially begun. With June marking the beginning... forecasters have already predicted an "above average" hurricane season should be expected this year. With a potential for 5 to 9 hurricanes and 2 to 4 major hurricanes...it is important for you to adequately prepare.

In the case of a hurricane...remember these tips:

- Watch or listen for Emergency Alerts
- Hide from Wind and Run from Water
- Know your Evacuation Routes and Lane Reversals
- Please heed all Evacuation Warnings and Instructions

For all this information and more....pick up this 2017 South Carolina Hurricane Guide at any Walgreens store statewide. It is also available at all South Carolina Welcome Centers... and at these SCDMV offices. You can also find this information at SCEMD.org.

Remember....preparation CAN save lives. To all South Carolinians...please be safe this hurricane season.
