Message:

This message is a petition for redress of grievances.

As a citizen of the United States of America I want you, as my representative, to support the broadest vaccine exemptions on religious, medical and philosophical grounds.

I want you to stop the move in many states to impose harsh restrictions on religious and other conscientious objections to vaccinations.

A free person who, after conscientious consideration of the medical, philosophical and/or religious implications, should be free to refuse all vaccines.

Vaccinations interfere with the natural process of the immune systems and the bodies ability to rid itself of damaged cells.

Vaccines can be dangerous and ineffective as unbiased science demonstrates. Even if they did provide protection against the diseases they are designed around, the toxins in vaccines are nothing short of horrendously dangerous.

In recent times the CDC was saying the flu shot was 60% effective which lead many to believe that it was preventing the flu in 6 out of 10 people but it does not. Research has shown that only 2.7 out of 100 adults get the flu.

31 studies from 44 years showed that the flu vaccine only prevented 1.5 out of every 100 adults from getting the flu.so 60% is of the few that get the flu and not of the entire population.

Even more disturbing is that the flu shot is not effective for those that are most likely to need it the most which is those with weakened immune systems like the elderly 65 years of age and older.

Why are groups of people that are living similar lifestyles but do not vaccinate not inflicted with the growing epidemic of health problems like the participates? It should not take a genius to answer this question.

It is time to stop the drug companies from controlling our government so it can make huge profits at the expense of peoples health.

&quot;Vaccination is Violation.&quot;

Please choose &quot;We the people&quot; instead of we the big corp.

Thank you for your time and consideration of this,
