Andrew/ Gordon I am hopeful you will forward this to all Geo Domain owners and other large and small media around the country . Each and every media no matter who in every city is effected if nothing else from depletion of ad budgets by these non profits selling advertising . My victory is everyone's victory . Further imagine if IRS does not Act or enforce their own tax codes ?? This will open up the door for all media in the destination marketing and local tourism business to also set up their tourism media as a 501-c6 non profit and legally avoid paying 35% corporate taxes in America. Imagine earning 1m and saving 350k plus pay yourself a pay package of 400k per year like the head of our small Chamber on Hilton Head is doing . Much better than hiding your money in Switzerland and risking prison.

Imagine the Billions that are being lost to IRS by these Chambers /CVBs violations, and the billions more lost when all media in the USA shift to this non profit 501-c6 business model, along with total justification operating with excessive salaries and expenses.

I don't think I have ever been so excited in my life to be the lucky person who was chosen to figure this all out. Thanks

Hi Skip:

My article is up:

<http://www.dnjournal.com/archive/lowdown/2013/dailyposts/20130118.htm>

Don't know if you have done this yet, or thought about it, but a useful resource would be to put up a website with the highlights of your fight - the various Chamber abuses, documentation, actions taken, media attention the battle has received, etc. It is such a big topic that most media outlets can't begin to cover it all in an article but if they could link to a site that has the bigger picture with full details, that would be a big asset in spreading the word about how pervasive this is.

Best Wishes

Ron

Bottom line is and needs to be stressed Unfairly competing with all medias nationwide radio , TV , newspapers , information websites . They are also draining local ad budgets and from IRS side in violation of 501-c6 tax codes of America . I have filed against the biggest city CBV's and Chambers in the USA . I have also filed against the Us chamber and the abusive salary of 4.7 m limo and jet paid to Tom Donahue can be varified by search and Huffington post story .

| Sounds good - you can let me know how the TV initiative is going as it

develops. The Island Packet has a good summary of what your suit involves and have your past emails on the situation, so can put together a Lowdown post from those materials. As our focus is domain names I will focus most on how they are unfairly competing with your online geo properties and other local media businesses.

Lets focus on the Chamber lawsuit and my IRS whistle blower case . I can feed you lots of info . The TV channels will simply be Internet full feature

films allowing TV production companies to load for free. Any advertising bought within their film they receive 15-25 of gross revenues . Their will be a checkout card at end of film to buy items related to the film and also

rating the film and location . We will have detachable databases by city , state , country and species for guides , lodges and outfitters . Thanks

Hi Skip:

I would like to know more about this - when and where the videos channels will launch, who will produce the videos, etc.

By the way, I am planning to do a Lowdown post on your lawsuit announced this week. Had some stories backed up that I had to get posted first with will be doing this tomorrow or the first of the week.

Best Wishes

Ron

We are going Internet TV channels and all will be free. Every production company with full length TV shows can load their programs for free. Google , YouTube , Craig's list and Facebook are free so are we. Thanks for all your past interest .

Fishing.com TV

Shooting.com TV

Flyfishing.com TV

Hope to get owners of Hunting.com and Archery.com to join us later .

These 5 brands encompass the entire sporting world. Thanks
