South Carolina State Parks

at 12:00:00 on 10/24/2014 UTC

Dolphins are amazing creatures! Have you seen them strand feed? Strand feeding is a technique dolphins in coastal Georgia and South Carolina use to catch fish. When dolphins find a school of fish, they rush at the fish pushing their bodies up onto the mud flat forcing the fish up onto the mud flat. The dolphins will then crawl around on their sides consuming fish that were driven up onto the mud.

Drusilla C. McCurry Cool

at 12:32:56 on 10/24/2014 UTC

Jill Haack We saw this while visiting Edisto this week! So cool!

at 13:01:00 on 10/24/2014 UTC

Brandi Hardin We saw this years ago at Edisto. We watched them do this for hours.

at 13:20:57 on 10/24/2014 UTC

Angel Woodle I had no idea.

at 13:49:34 on 10/24/2014 UTC

Jeannine Mills I have seen it once in the marshes of James Island County Park. Lifetime memory.

at 15:34:03 on 10/24/2014 UTC

Sahra Hashemi Whoa so cool!!!

at 20:00:56 on 10/24/2014 UTC

Mark Holsclaw Yeah and they tend to use the same side kinda like being left handed it right handed and it wears their teeth down on that side from biting sand along w/ the fish

at 22:12:35 on 10/24/2014 UTC

Tim Vinson It is pretty neat to sit and watch them feed like this.

at 0:18:40 on 10/25/2014 UTC

Cal Broome I've seen this and it is very neat. We also know when Dolphin are in a creek, best to find another place to fish.

at 0:45:34 on 10/25/2014 UTC

Peggy Miller Lawrence I would love to see it once.

at 0:51:22 on 10/25/2014 UTC

Wanda Bard Waltz Dolphin are very smart animals I love them♥

at 1:31:22 on 10/25/2014 UTC

Sandra Hanes Wow, amazing!

at 10:48:56 on 10/25/2014 UTC

Donna Glover Bowers Do they do this all the time or just a certain time of year? I would love to see them do this!
