<SUBJECT>unsafe vehicles on roadways</SUBJECT>
<MSG>

I believe we need to put into effective a system that allows other drivers and law enforcement on our roadways to be aware when there is an unsafe vehicle on the road. I work on brake systems all day long and have had a number of vehicles come through my shop and decline work being done on the brakes when they have no pedal, bad calipers, bad hub assemblies etc... I have been in two accidents that were no fault of my own (being rear-ended by unsafe vehicles and the other driver admitted they had no brakes) I firmly believe we would have safer roadways if there was a way to see if there is an unsafe vehicle on the road. Maybe we could have a system where if the car is unsafe and the driver declines work that the mechanic shop could put something on the vehicle like a red sticker or something to that

effect that can only be removed by that shop when the work is complete, so other drivers are aware of that vehicle and can call law enforcement. I drive on the highway everyday to and from work and am constantly hearing on the radio about accidents which I believe can be turned around if we had something in place to prevent unsafe vehicles on our roadways. Thank you for your time and consideration in this matter
