---

Well Mr. Pomaville responded. Not sure what to do with this or how to respond. Suggestion "I will pass your concerns along to the Lieutenant Governor, but we recommend you contact your Senator and Representative who are able to vote on the bill." (insert senator and representative)

Catherine,

Thank you for taking my call. Regarding bill H3133, which wants to force all nurse-midwives to have continuous education classes throughout their tenure, I would like to comment. The bill claims that it's beneficial to the children's and parents safety. The fact remains that the true beneficiary is the Certification Board, as this gives them "Job Security" with no competition or price control. Midwives will be forced to pay a fee, and the burden will be passed to the poor families who already cannot afford the cost. Alternatively, the cost is passed on to the taxpayer, never-the-less forced on to the people. Probably both will happen.

The fact is that Government is intruding on everyone. No longer do we have a right to our own pursuit of happiness. In the name of safety, our lives are put under the control of the government. Even though the number one cause of premature death in the United States is due to misdiagnosed symptoms and improper prescriptions, not to mention abortions. This occurs within the "safety" of the medical field. Safety is not the issue, control is!

The opinion of our midwife, is that Bill H3133 will force midwives to practice the hospitals regulations and eventually be blended in as the same. Then they will be eliminated and there will be no choice. They will induce labor, force drugs, and not allow nature and natures God to do its job. If they wish to rebuke this letter in the name of "safety", I would urge them to criticize all of the "loving and caring" laws that are passed to allow the choice of abortions. In the name of safety, they vaccinate the children so much that studies are showing a relationship between this and down syndrome. When will "the right to pursuit of happiness and Natures God" be given back to the people? Where does the force to protect us stop? We can no longer choose how to have our own baby, unless we want to abort the child!

If a birthing center is not government controlled and someone does not like it, they can chose not to use it. They can go to planned parenthood, which proves that it's not about safety. It's about money and control as lobbyists buy their way in.

The reason I know this bill is unnecessary is because we already can make our own choice to use a midwife or not. If the system becomes one, there will be no choice. If there is no choice, then it's clear this bill is not "for the people".

The only bill that needs to be passed is to deregulate birthing centers. This helps people of faith afford good health care. Let the people choose for themselves. The cost of your protection is becoming unbearable. Anyone who wants more regulation and structure is free to go to the hospital.

Good Afternoon Mr. Pomaville,

I assist the Lieutenant Governor with policy issues. If you could please provide some more information on your concerns, such as exactly who you mean by Pharma and in what way they are running midwives out of business. That would help us look into your concerns. Thank you and I look forward to hearing from you.

Kevin,  
You said to E-mail you. What can we do to stop Pharma from running the midwives out of business?

Regards
