## THE FOUR HORSEMEN OF THE APOCALYPSE: DEPRESSION, PLAGUE, TERRORISM, WAR

### INTRODUCTION

We live in a day of great turmoil, upheaval, and rising evil. Evil men are socializing America and moving us rapidly toward a Marxist/Nazi-style police state and dictatorship. Terrorism is now exploding in many corners of the world – moving rapidly from the Islamic dominated Middle East into Europe, Africa, Asia, and North America. This writer does not believe that this proliferation of Islamic fundamentalism (epitomized by Shiite dominated Iran, al Qaeda, and now the off-the-charts violence and slaughter of innocents by ISIS – the Islamic State) is just spontaneous or happening by chance. There is some great power or guiding hand behind the scenes energizing this explosion of Islam in the Middle East, mass migration of Muslims to Europe, and the newest move toward a global Caliphate uniting Muslims all over the world in the cause of jihad and global domination.

### 1. HOW ELSE CAN YOU EXPLAIN?

This writer believes there is a satanic dynamic behind this phenomenon, but that it is now being orchestrated, financed, and energized (also armed and trained) by powerful forces (elites) in the West – and especially in America. How else can you explain the US overthrow of the Shah of Iran in 1979 and installation of the radical fundamentalist Muslims under Ayatollah Khomeini. (Read the Shah's autobiography, *The Shah's Story*, for a full firsthand account of that betrayal.) How else can you explain the American orchestrated Arab Spring, wherein the US helped overthrow the moderate, secular Muslim governments of Iraq, Egypt, Libya, Syria (still in process), Yemen, and Tunisia and install radical fundamentalist Islamic regimes who hate America and the West? Is it just because our president is a Muslim, with Muslim aides all around him, or is there something more?

The McAlvany Intelligence Advisor edited by Donald S. McAlvany is a monthly analysis of global economic, monetary, and geopolitical trends which impact the gold and precious metals markets and is explicitly Christian, conservative, and free-market in its perspective. Information contained herein has been carefully selected from sources believed reliable, but absolute accuracy cannot be guaranteed.

How else can you explain America's non-stop wars in the Middle East (ostensibly to bring democracy to an area that has never known democracy in all of history)? How else can you explain America's funding, arming, and training of al Qaeda and other fundamentalist terrorists over the past 25 years and more recently the arming, financing, and training of the vicious, sadistic ISIS butchers (whom we are now bombing in Iraq)?

How else can you explain Obama's attempt a year ago to get America involved in yet another war – in Syria – to overthrow the secular Muslim government of Bashar Assad and replace it with the radical fundamentalist jihadists who are now butchering (i.e., beheading and disemboweling) innocent Christians (including children and reporters) all over Syria and Iraq? That new war was only derailed by the intervention of Vladimir Putin. And now, at this writing (after the third widely televised beheading by ISIS), America is preparing to move special forces and conventional military forces back into Iraq, and maybe into Syria.

Are America and our foreign/war policies run by total fools (one thinks of John Kerry) or is there a sinister plan to destabilize the entire Middle East, unleash incredible chaos, and create a united radical jihadist Islamic front that can spark terrorist chaos around the world and be a trigger for another great war? This writer believes these policies are self-serving, are designed to trigger and perpetuate very profitable non-stop wars (just as George Orwell predicted), and to create chaos all over the Middle East – which is now spilling over into Africa, Europe, and America. But no, these men behind the scenes in America (and to some extent in the UK and Europe) are not fools. However, like the leaders in Soviet Russia and Nazi Germany (and their real behind-the-scenes controllers), they do have a plan, an agenda, an evil strategy behind their machinations.

## 2. THE AGENDA OF THE AMERICAN GLOBALISTS: WORLD GOVERNMENT

So, why are they doing what they are doing to destabilize the world, and create chaos? Hint: it is not exclusively about money – though it is true that they are losing control of their very profitable financial empire (and US dollar dominance) – which could implode in the not-too-distant future. And they definitely are fighting back to preserve their great wealth machine. (That is what the massive gold price manipulation over the past few years has been all about.)

Their long-term goal, however, is world government – a global socialist (think fascist) high-tech, glob-

al dictatorship or police state run by and for the globalist elite. They know that their mega-trillion-dollar financial house of cards is about to collapse, and so they are gearing up for war – a very old strategy used by despots throughout history when they are losing political and/or financial control. Iraq/Syria will be the first new war, and conflict with Russia related to Ukraine will be the second.

Hence, we are witnessing the US's current policies to intentionally destabilize the Middle East; to bully Russia with sanctions and the moving of US/NATO missiles and troops into Russia's back yard; and to ratchet up the war on terror (via the Islamic jihadists they have been secretly supporting). All of these things are the excuse for the powers-that-be to impose burgeoning police state controls on the people – “to protect us from terrorists, foreign or domestic.” This strategy includes false flag terrorist attacks (like the Boston Marathon bombing) that then “justify” increased police state measures. (Consider the present massive Federal military arming of the local police around the country.) The goal is a police state/dictatorship in America, and ultimately across the entire planet.

## 3. A 238-YEAR-OLD STRATEGY: CENTRAL BANKS AND WARS

It is important to understand that this is not a new strategy. It goes back hundreds of years to the creation of the Illuminati in Bavaria in 1776 by Adam Weishaupt and a group of wealthy European elitists. The so-called “illuminated ones” were illuminated by and guided by (according to their own writings) Lucifer, Son of the Morning Star (aka Satan in the Bible). This was also the dynamic behind the Nazi Third Reich – Hitler and his hierarchy were Satan worshippers. The goal of the Illuminati was (and still is) world government, which they or those who followed after them would bring into being and which would ultimately be led by their supreme leader – Lucifer.

### a. CENTRAL BANK CONTROL AND MANIPULATION

The Illuminati's means for achieving this goal would be by controlling the world's financial system. They would do this by creating central banks all over Europe and eventually in America and around the world, by which they would control and ultimately be able to direct and manipulate economies, investment markets, the entire financial system – and even start and stop wars. They knew this process would take hundreds of years, but they were patient visionaries who were inspired by their dream of world government and by their leader – Lucifer.

## b. PLANNING FOR THREE GREAT WARS

In about 1875, their American leader, General Albert Pike (a former Confederate general) wrote an updated strategy for the eventual Illuminati world domination. This strategy included three major world wars – each of which would dramatically rearrange the global chessboard and set the stage for the next war, and ultimately the final (third) world war. The first two wars were to start in Europe (according to Pike's writings) and would be started in, around, or by Germany. The second great war was supposed to raise Russia to world superpower status – where it would subsequently be held in check until the third great, and final, war. Out of the chaos and ashes of that third great world war would arise from the ashes (like the mythical Phoenix) their final world government.

## c. THE US WOULD ULTIMATELY EVOLVE AS THE EPICENTER

The US would become the engine from which the final push for world government would emanate. The European Illuminists contrived to get two central banks started in the US (the First and Second Banks of the US), but wise US leaders who understood the European power grab closed down both of those central banks. Abraham Lincoln understood what these European Illuminists were doing, spoke out against and opposed them, and they assassinated him. (James Wilkes Booth, Lincoln's assassin, was an agent for those European elitists.)

They finally manipulated events to get their central bank established in America – the Federal Reserve (a private bank owned and operated by some of the most powerful elitists in the world) established in 1913. Almost 100 years after they killed Abraham Lincoln, John F. Kennedy tried to float new US Treasury Notes – a currency which would compete with the Federal Reserve's monopoly for the printing of money. He miscalculated the lengths the Illuminists would go to protect their money and financial power monopoly, and as a result, like Abraham Lincoln, he was assassinated. Later, when his brother and Attorney General Bobby Kennedy was about to be elected president with a promise to tell the whole story of why JFK was killed, they assassinated him too.

## 4. THE PLAN FOR THREE REGIONAL GOVERNMENTS

In 1970, the globalists set up a new organization – the Trilateral Commission – established by David Rockefeller, Averell Harriman, and Zbigniew Brzezinski. The globalist (Illuminist) strategy was to create three ma-

jor power blocks of nations that they would control: 1) the European Union – which of course today is a fait accompli, and essentially a global socialist takeover of almost all the governments of Europe; 2) the North American Union – a merger of the US, Canada, and Mexico, and eventually, just as Eastern Europe gradually came into the EU, Central America and at least part of South America would be grafted into the NAU; and 3) the Asian Union – to be composed of the major Asian nations. These three regional governments would eventually be merged into one giant global government – called by George Bush Sr. (in dozens of speeches) the New World Order. Bush Jr. campaigned hard for the NAU, but there has been a big pushback in America and it has not yet been brought to fruition – and may never be.

## 5. THE NEW WORLD ORDER VERSUS THE NEW AXIS

The big problem with the Illuminist world government plan via the NWO is that it will not work because of opposition from Russia and China, which do not wish to be ruled by Western Illuminists out of New York, Washington, or London, or to continue much longer under a US dollar-dominated global financial system. So, the world is being divided into two major camps – just as it was during WWII (i.e., the Allies and the Axis Powers): the New World Order nations (i.e., the US, UK, EU countries, Canada, Australia, New Zealand, Japan, and a few more) and the New Axis nations (Russia, China, the BRICS including India, a few minor communist countries such as Cuba, Vietnam, North Korea, Myanmar, Venezuela, etc.). The Islamic nations will probably be aligned with the New Axis powers when World War III finally erupts.

In all likelihood, the Illuminists probably knew that the entire world would not join their NWO coalition, and knew that eventually the world would be divided into two major camps based on the groups just discussed above. One could argue that due to their incredible arrogance, overconfidence, and power, the NWO crowd did actually believe the world, including Russia and China, would jump onto their bandwagon and follow orders. In any case, the world is being divided into two distinct camps and these will be the major opposing forces in World War III. Remember, the Illuminati strategy is for a Third World War, and out of the smoke, ashes, and destruction of that war, they believe their world government will emerge.

## 6. THE NUCLEAR WILD CARD

As the New Axis powers (led by Russia and China) dump the US dollar and move away from a US-dominated

global financial system. the American globalist powers-that-be are becoming desperate and are pushing the world toward war – in the Middle East, yes, but even more so with Russia. And herein lies what could be their fatal miscalculation for themselves and America. The American globalists are underestimating Putin and the Russian leadership – how intelligent and ruthless they are (the Russians are the chess champions, not the Americans), and the danger of picking a fight with a nation that has probably five times more nuclear weapons than America has. They are ignoring all of Sun Tzu's wisdom on never underestimating your enemy, and they are picking a fight with an opponent from a position of great weakness.

The last issue of *MIA* discussed how the Ebola pandemic in West Africa is exploding and may soon go global. Indeed, in the past 30 days, it has dramatically worsened – the deaths have doubled to 2,500, and the infections are skyrocketing. This issue of *MIA* will examine how Russia is not the easy pushover that America's arrogant leaders believe she is; how the Ebola pandemic and other plagues (many or most of them probably manmade) threatens the planet; how the globalists are trying to stamp out alternate medicine in America and around the world (i.e., sick or dying people are easier to control); how the Islamic jihadists are gaining strength and influence all over the world; and how in the midst of the coming economic/financial implosion, major war (possibly nuclear) could break out. The Four Horsemen of the Apocalypse seem to be on the move.

## A. IS RUSSIA PREPARING FOR NUCLEAR WAR WITH THE UNITED STATES?

The confrontation between America and Russia is accelerating from a war of words to a ratcheting up of US sanctions against Russia; from the US and NATO moving missiles into Russia's back yard to Russia officially divorcing itself from the US dollar. And the result of this escalating US/NATO confrontation with Russia (which was started by the US – not Russia) – is the rapid expansion of Russia's nuclear (strategic rocket) forces, and the most dangerous rhetoric on both sides since the end of the cold war. Russian nuclear missile submarines have actually been cruising in the Gulf of Mexico and off the US East and West coasts.

On September 10, Michael Snyder wrote the following regarding the Russian nuclear expansion: Did you know that two Russian bombers practiced launching cruise missiles at the United States from a spot in the North Atlantic in early September? And did you know

that Russia is spending massive amounts of money to build and test new nuclear weapons systems? Meanwhile, the Obama administration is doing absolutely nothing to upgrade the US nuclear arsenal. He is instead reducing it to pre-Cold War levels! Our nuclear officers are actually still using floppy disks and other computer technology from the 1960s.

## 1. RUSSIAN NUCLEAR SUPERIORITY OVER THE US

The size of the US nuclear arsenal has been reduced by about 95 percent from the peak of the Cold War, and Barack Obama has spoken of even more dramatic reductions. Obama is doing nothing even as a Russian general speaks of the need to "spell out the conditions under which Russia would launch a preemptive nuclear strike" against the United States. Obama appears to be entirely oblivious that a nuclear war between the US and Russia is a growing possibility. The reality is that we are definitely not prepared for one.

Even with everything that has happened between the United States and Russia lately, most Americans still believe that "the Cold War is over" and that Russia presents absolutely no threat to us. But Russia is behaving as if the Cold War is still very much on. You probably didn't hear a peep about it from the mainstream media, but in early September a couple of Russian bombers simulated launching cruise missiles at us from the North Atlantic. The following is an excerpt from an excellent article by Bill Gertz.

## 2. RUSSIA FLEXES ITS NUCLEAR WEAPONS MUSCLES

Two Russian strategic bombers conducted practice cruise missile attacks on the United States during a training mission last week that defense officials say appeared timed to the NATO summit in Wales. The Russian Tu-95 Bear bombers were tracked flying a route across the northern Atlantic near Iceland, Greenland, and Canada's northeast. Analysis of the flight indicated the aircraft were conducting practice runs to a pre-determined "launch box" – an optimum point for firing nuclear-armed cruise missiles at US targets, said defense officials familiar with intelligence reports.

And Russia is spending money as if a nuclear confrontation with the US is a very real possibility. In fact, Russian President Vladimir Putin has committed to a "weapons modernization program" that is going to cost the equivalent of 540 billion dollars.... Putin said Russia's weapons modernization program for 2016-2025 should focus on building a new array of offensive weap-

ons to provide a "guaranteed nuclear deterrent"; re-arming strategic and long-range aviation; creating an aerospace defense system and developing high-precision conventional weapons.

He would not elaborate on prospective weapons, but he and other officials have repeatedly boasted about new Russian nuclear missiles' capability to penetrate any prospective missile shield. The Kremlin has bolstered defense spending in the past few years under an ambitious weapons modernization program that runs through 2020 and costs the equivalent of \$540 billion. Putin is deadly serious about being able to fight (and win) a war against the United States.

Of course nobody on either side actually hopes that such a war will happen. But most wars are won before a single shot is fired, and right now Russia is working very hard to make sure that it will have the best chance possible of coming out on top in any future conflict. For example, Russian media is reporting that 60 percent of all Russian nuclear missiles will have radar-evading capability by 2016....

Russia's Defense Ministry plans to complete the rearmament of Strategic Missile Forces within six years. *"By 2016, the share of new missile systems will reach nearly 60%, and by 2021 their share will increase to 98%. At the same time, the troop and weapon command systems and combat equipment will be qualitatively improved. First of all, their capabilities for the suppression of anti-missile defense will be built up,"* Defense Ministry's RVSN spokesman Colonel Igor Yegorov told ITAR-TASS on Friday.

### 3. RUSSIA'S NUCLEAR SUBMARINE BUILDUP

But of greatest concern is the new generation of nuclear-powered attack submarines armed with long-range cruise missiles that Russia has been developing. In early September, Russia conducted a successful test of the new submarine-launched Bulava intercontinental nuclear missile ... and will perform two more test launches in October and November, the head of its naval forces said. The 12-meter long Bulava has undergone numerous tests, some successful, and can deliver an impact of up to 100 times the atomic blast that devastated Hiroshima in 1945. Each one of these missiles weighs more than 36 tons and has a range of more than 5,000 miles.

But in a future conflict, they would likely have to travel only a short distance. That is because Russia has developed super silent attacks subs that are **virtually undetectable** when submerged. Russia is building subma-

rines that are so quiet that the US military cannot detect them. These "black hole" submarines can freely approach the coastlines of the United States without fear of being detected whenever they want. In fact, a nuclear-powered attack submarine armed with long-range cruise missiles sailed around in the Gulf of Mexico for several weeks without being detected back in 2012.

And now Russia is launching a new class of subs that have "advanced stealth technology." The US Navy refers to these virtually undetectable subs as "black holes".... The US Navy openly acknowledges that they cannot track these subs when they are submerged. That means that the Russians are able to sail right up to our coastlines and launch nukes whenever they want. Most Americans don't realize this, but Russian subs can come cruising right up to our coasts without us knowing about it and launch missiles that will start hitting our cities within just a few minutes.

And if you do not think that this can ever happen, perhaps you should consider what a Russian general said in early September about a preemptive nuclear strike. A Russian general has called for Russia to revamp its military doctrine, last updated in 2010, to clearly identify the US and its NATO allies as Moscow's enemy number one and spell out the conditions under which Russia would launch a preemptive nuclear strike against the 28-member military alliance, Interfax reported Wednesday.

Russia's military doctrine, a strategy document through which the government interprets military threats and crafts possible responses, is being revised in light of threats connected to the Arab Spring, the Syrian civil war and the conflict in Ukraine, the deputy chief of the Kremlin's security council told RIA Novosti in early September. Meanwhile, the Obama administration has discussed reducing the size of our already neutered strategic nuclear arsenal down to just 300 warheads. [ED. NOTE: One could not be faulted for wondering if BHO is in reality a deep cover agent for the Russians or simply hates America so much that he wants to see its destruction.] Let us hope and pray that we never see a nuclear war between the United States and Russia. Because if one does happen, there is a very strong possibility that America will not be the winner.

### B. THE GROWTH OF RUSSIAN MILITARY POWER

In America, and much of the West, the experts are claiming the Russian Army is weak and could not wage war. The reality is just the opposite: Russia is actually looking at expanding its military policy; re-targeting

Europe and the USA as enemies; and rewriting protocols for justification of a defensive first strike with nuclear weapons. The greatest mistake that the West has made so far is to judge Russia through their own eyes based upon extreme arrogance and prejudice. Indeed, the arrogance of the politicians can force war by their unyielding posture and inability to realize that they have left their opponent with no other option (i.e., it is unwise to push your enemy into a corner with no avenue of retreat). This is exactly what America and the EU are doing with their draconian sanctions against Russia and moving missiles and war games into Russia's backyard.

The arrogance of assuming that Russia is weak and could not afford war is a huge mistake. It is the West that cannot afford war in the middle of an economic implosion where we have a sovereign debt crisis brewing on an unprecedented scale. War also has been an escape valve for fiscal mismanagement. In this respect, war becomes desirable as a decoy to hide the inability of politicians to cope with managing (or mismanaging) the state.

## 1. THE REALITY OF RUSSIA'S MILITARY STRENGTH

The Russian military forces are composed of 150,000 officers and 766,000 soldiers on active duty. There are about 2,485,000 reservists. The Russian Ground Forces have 15,500 tanks, 27,607 armored fighting vehicles (AFV), 5,990 self-propelled guns (SPG), 4,625 towed artillery guns, and 3,781 multiple launch rocket systems (MLRS), according to reports of the military portal Global Fire Power. For the Air Force, Russia has about 3,082 airplanes, jets, and helicopters. Russia has only about 114 combat helicopters compared to the USA's 914 attack helicopters – not counting those bought by local civil police, as in Florida.

The Russian Navy has 352 ships and boats. However, Russia has only one aircraft carrier, in the Admiral Kuznetsov class. This was in service in 1991. Moscow would like to supplement this holding by two helicopter carriers, Mistral class, from France.

Moreover, Russia has over 4,600 nuclear warheads ready for use in their collections. Additionally, Russia has 7,300 nuclear warheads in reserve. Furthermore, Russia has about 330 intercontinental ballistic missiles that could be targeted against the USA domestically. In addition, ten nuclear submarines are equipped with 160 missiles and there are another 576 nuclear warheads.

In the next few years, the rocket classes Bulava (SS-N-30), Jars (NATO code SS-24), and Iskander-M (SS-26

Stone) are to be built. Russian technology in rocket manufacture is not to be underestimated. Just in the past decades since the Cold War ended, Russia has 117 different missile technologies that have been used. These systems are partly to extend older technologies. The missile defense system A-135 (NATO code ABM-3) is in Moscow and is ready for use. It protects the capital and the surrounding area from possible attacks. (America has no such missile defense system.) Unlike Iraq or Syria, the USA could not simply invade with conventional forces with impunity. This is not a war that could be won in such a manner.

## 2. RUSSIA'S EMERGING PRIVATE/SECRET ARMY

Young men in Russia are drafted into the army, but many find ways to evade the draft – just as we saw in America in the 1960s and '70s. Russia also has huge problems with alcoholism in the military (and throughout its entire culture). To cope with these problems, Putin is actually looking to alter the entire system by adopting the privatization of the military sector. During the next few years, we will see the rise of private armies taking over tasks of the defense. This will break the back of the problems with the Russian military and propel it into a new era.

The largest private army in Russia's Federal State is the Unitary Enterprise Okhrana. This was launched in 2005 by the Home Office and has proven to be a tremendous success. It now has more powers than regular security forces. Competitors in the market complain about the state privileges enjoyed by *Okhrana*, for it is becoming far more responsive than standard military units and has set the tone for a crack military force. Russia will cut its government military forces in half by as early as 2020 (barring war), and it will replace them with private armies consisting mostly of Russian ex-soldiers. This is the new Russian-formulated Military Strategy. Most in the West do not even comprehend that this is a major trend.

## 3. AMERICA'S SECRET ARMY

Nobody is paying much attention to the privatization of the military in Russia (and even in the USA). However, if a head of state is then asked, "Are your troops there in someplace?" they can safely and honestly deny that "their" troops are even there. Putin is merely copying the USA, yet the Western press failed to make the connection to the fact that during the Iraq War, there were times when private armies for the USA had in fact outnumbered "official" troops on the ground. In 2008, the US Defense Department employed 155,826 private contractors (mercenaries) in Iraq, versus 152,275 reg-

ular troops. In 2010, America used 94,413 private contractors in the Afghan war, versus 91,600 regular US troops.

These mercenaries do not have to be given pensions. They can do operations off the radar screen of the US Congress, the media, and the public. These off-the-radar operations can include guerilla warfare, coups (i.e., regime change), assassinations, and secret warfare. Such are often done at the behest of the CIA. (A classic example is America's secret arming and training of ISIS in Syria, starting about two years ago.) The main government contracting (mercenary) company in America is Academi (formerly Blackwater Associates), controlled by some of America's most powerful globalist elites. Academi and other lesser known mercenary contracting firms have an incredibly powerful lobbying presence in Washington and a strong vested interest in more wars and conflicts – war is their business. (America is now spending about \$5 billion per year on these secret operations.) This private military contracting business is huge and growing rapidly – which explains in part all the wars America has been involved in in recent years, right up through the present.

Both America and Russia are now deploying secret armies that will enable them to conduct military operations, coups, assassinations, etc., while denying any involvement or knowledge of same – as America did in the Ukrainian coup and in backing the Muslim Brotherhood's rise to power in Egypt, and is presently doing in Syria, etc. Russia is now copying America in this respect, and as the New Cold War heats up, so will these kinds of conflicts all over the world.

The present sanctions against Russia embolden Putin – they do not weaken him. They allow Putin to shift the blame to the US, and that plants the seeds for war. We are headed into a very dark period with rising privatized armies that need war to survive. This is the very precise way Rome fell – its military needed war to survive economically. And meanwhile the US keeps challenging Russia in the latter's own backyard. Could this be setting the stage for World War III – a war that could go nuclear at some point?

## C. ISIS TERRORIST CELLS ARE PREPARING TO CARRY OUT DOMESTIC TERRORISM IN AMERICA

On Aug 23, Dave Hodges wrote the following sobering assessment regarding ISIS coming to America: The CIA sponsored ISIS is providing the reasons for a "justified" incursion into Syria in order to stop ISIS. ISIS

sleeper cells are also making their way into the United States hidden among hundreds of thousands of illegals since Obama threw open the US border. According to both my sources and Dr. Jim Garrow, an ex-CIA operative, an imminent terror attack upon a multitude of shopping malls may be carried out by a contrived terrorist group. Martial law would probably follow shortly thereafter across America. And if this plot is foiled, an unspecified "Plan B" attack is waiting in the wings.

## 1. THE INSERTION OF ISIS TERROR GROUPS INTO THE UNITED STATES

Follow the chain of events that clearly describes how ISIS has gained access to the United States: Our southern border is completely wide open (thanks to Barack Hussein Obama) and groups like the Sinaloa drug cartel and MS 13 are coming into the country in great numbers, and they are bringing ISIS sleeper cells with them. It has been admitted to in the mainstream media, since 2007, that the Mexican drug cartels are openly involved in Middle Eastern terrorist groups. My DEA source has implicated the Peruvian drug cartel, the Sanchez-Peredes cartel as the arms and drug supplier to the Sinaloa cartel. The Sanchez-Peredes get their arms from Hamas, and are also tied into the Muslim Brotherhood, al-Qaeda, Hezbollah, and the CIA-created ISIS.

Speaking of ISIS, which is a hybrid organization comprised of every terrorist group mentioned in this article, ISIS is rampaging across Iraq and into Syria armed with abandoned American military equipment which should have been destroyed when our troops left Iraq. And with arms directly provided by the Obama administration over the past couple of years, ISIS is everywhere. ISIS has promised a Caliphate upon America through several tweets. (It is believed that hundreds – perhaps thousands – of ISIS terrorists are now entering the US via Obama's open border policy.) ISIS has even made a public appearance in Ferguson.

ISIS has also invaded the West Bank in Gaza. This is significant because this puts ISIS in direct confrontation with Israel and this would endear ISIS to American-based Muslim organizations such as CAIR. ISIS has also spread to Malaysia, Indonesia, the Philippines, the UK, and Europe at this writing – and is inspiring and recruiting young Muslims to its cause by the thousands every day all around the world.

ISIS has engaged in the PSYOPS beheading of James Foley, Steven Sotloff, and on September 13<sup>th</sup> a reporter from the UK, David Haines – and the murder of untold numbers of Christians in Iraq and Syria. In this respect, they are copying Muhammad's technique for conquest –

intimidation, slaughter, and subjugation. The ISIS PSY-OP is stirring the American public into war fever, and will provide the impetus for Obama to get what he so desperately needs in order to satisfy his globalist handlers, which is a way into Syria. No doubt, Russia will respond militarily, and the hostilities leading up to WWII will commence. The ISIS PSYOPS are everywhere from the Gaza Strip to our southern border, and may soon be in a many shopping malls in America.

## 2. THE FOUNDATION FOR ISIS DOMESTIC TERROR OPERATIONS WERE LAID A LONG TIME AGO

Many jihadists have altered their modus operandi and subsequently adopted a type of stealth and cultural jihad as evidenced by excerpts of a 2007 Muslim Brotherhood strategic memo, which states that *"The Ikhwan [Muslim Brotherhood] must understand that all of our work in America is a kind of grand jihad in eliminating and destroying Western civilization from within and sabotaging their miserable house...."* ISIS is the fulfillment of this goal.

On one hand, we find prominent Islamic organizations, such as the Council on American-Islamic Relations (CAIR), condemning ISIS's present actions in the Middle East. However, it appears that these groups are talking out of both sides of their mouth as Omar Ahmad, the co-founder of CAIR, made his anti-Christian bias crystal clear on July 4, 1998, in a *San Ramon Valley Herald* article in which Ahmad stated *"Islam isn't in America to be equal to any other faith, but to become dominant. The Qur'an should be the highest authority in America."* This philosophy, commonly dubbed Sharia law, is being subtly (but unofficially) implemented right under our American noses and in a number of local venues (and with the quiet backing of Barack Hussein Obama). Check out Dearborn and Detroit, Michigan (or Marseilles, France).

*Investor's Business Daily (IBD)* reports on a very disturbing effort by a group that is attempting to sell itself as simply a Muslim coalition. The Muslim Brotherhood is working actively towards developing a third political party, *"turning Muslims into an Islamic voting bloc."* This would be a move in the direction of implementing Sharia Law as the law of the land in the United States. Among the groups involved in this attempted takeover of the American political system and destruction of America as we know it is the Washington-based CAIR. This group has been directly linked to the terrorist group Hamas, not just in the way of verbal support, but financial support as well. Notice how the same groups keep surfacing? Hamas? Hezbollah? ISIS? [ED. NOTE: Obama and

his numerous high-level Muslim appointees have been running interference for CAIR and the other Muslim groups in America.]

IBD identified another group as the Muslim American Society, described as *"the overt arm of the Muslim Brotherhood in the United States."* According to IBD, this group praised Osama bin Laden as *"a visionary who believed in an Islamic state in Afghanistan."* That's right, the man responsible for the death of so many Americans at the hands of Muslim terrorists described as a *"visionary"* by a group that wants to take over the American political system.

PBS Frontline aired a damning report on how American handlers in Turkey are presently working with Qatar to train ISIS – referred to as rebels in the program. Subsequently, the US, NATO, Turkey, and the Gulf Emirates not only support the ISIS rampage across Iraq and Syria, but these groups are also providing funding, training, and arms to ISIS. Again, this is clearly a CIA operation.

In summary, there can be no doubt that a hybrid force (i.e., ISIS), drawn from several terrorist groups, has crossed our southern border in fulfillment of something akin to the Garrow warning. It is also proven beyond a shadow of a doubt that ISIS terror cells are here and their presence represents a larger plot involving groups like CAIR, which have the long-range goal of destroying America.

ISIS is proving to also be the utility terrorist group. If one needs a PSYOP to inflame the public and to support a military incursion into Syria, ISIS is serving that purpose. If a terrorist group is needed to provoke domestic terror attacks in order to bring about martial law in the US, ISIS serves this need as well. Predictions are a fool's errand. However, it is hard to believe that we have long to wait. The bottom line is that this is the way for the globalists to start WWII and strike down the US at the same time.

## CONCLUSION

It is ominous to see the present exploding growth of ISIS, which got its original funding, arming, and training from the US government (CIA). ISIS's violence and influence is mysteriously growing all over the Middle East, and rapidly in many quarters of the world. Since they started in Syria with the help of the US – with their first goal the overthrow of the Assad government in Syria, this is another major area of confrontation between America and Russia – the latter being a staunch supporter of Assad. A little over a year ago, as

Obama was trying to sell a US invasion of Syria to the American people and our allies, Putin and Russia intervened with the strong threat that if America invaded Syria, Russia would go to war with America. Obama backed down at that point, but is now trying to do the same via America's new involvement in Syria and Iraq "to oppose ISIS." If the American military moves in any meaningful way into Syria (either overtly or covertly), this could trigger war with Russia.

It should be remembered that the present hostility between Russia and the US (and NATO) began when the Obama CIA helped to overthrow the freely-elected government of the Ukraine a couple of years ago and installed a puppet government subservient to the US. When the Russians began to push back, the US influenced NATO to start positioning missiles in Eastern Europe near the Russian border and then the US launched economic sanctions against Russia and got its NATO partners to do likewise. In effect, the US and its European allies declared economic war on Russia. Then, when the Malaysian airliner (MH-17) was shot down over the Ukraine – probably by Ukrainian government military jets (using air-to-air missiles) – the US doubled up on its sanctions and persuaded its European allies to do likewise.

Remember when Nikita Khrushchev moved Russian nuclear missiles into Cuba 90 miles from our shoreline in 1961 (i.e., the Cuban Missile Crisis)? It almost triggered nuclear war between the US and the Soviet Union. America has just done the same thing to Russia. The words "provocation" and "confrontation" come to mind. Are the powers-that-be in Washington trying to pick a fight (or start a war) with Russia – possibly as a distraction from the approaching financial meltdown and collapse of the US dollar? If so, they are playing a very dangerous game, and are badly underestimating Putin and the present (and growing) Russian nuclear superiority over America. Indeed, on September 15, US and NATO military forces held military exercises inside of the Ukraine. This is the equivalent of Russia or China holding military exercises in northern Mexico just south of the US border. Again, how do you spell "provocation"?

In war or any kind of confrontation or competition, it is wise not to underestimate your opponent, or to unnecessarily provoke him. (Such arrogance and miscalculations were what led to both world wars!) To do so is the height of arrogance, and very foolish indeed. That is exactly what BHO and his handlers in Washington are doing with respect to Russia at present. And if they do precipitate a nuclear war (or, God forbid, launch a

nuclear first strike on Russia, or even contemplate, or threaten such a thing), it could unleash a cataclysmic nuclear firestorm, and it is most likely that America would be the big loser in such an exchange.

## II. AS VIRAL PANDEMICS SPREAD: THE US GOVERNMENT IS CLOSING DOWN ALTERNATE MEDICINE IN THE UNITED STATES

*"Carried by this tsunami of illegals are the invisible 'travelers' our politicians don't like to mention: diseases the US had controlled or virtually eradicated: tuberculosis (TB), Chagas disease, dengue fever, hepatitis, malaria, measles, plus more.... A public health crisis, the likes of which I have not seen in my lifetime, is looming. Hardest hit by exposures to these difficult-to-treat diseases will be elderly, children, immunosuppressed cancer-patients, patients with chronic lung disease or congestive heart failure."* – Elizabeth Lee Vliet, MD, WND, June 17, 2014

*"Why are such swarms entering the US illegally NOW, particularly children? Newspapers in Mexico and Central and South America are actually describing US 'open borders,' encouraging people to come with promises of food stamps or 'amnesty.' It is textbook Cloward-Piven strategy to overwhelm and collapse the economic and social systems, in order to replace them with a 'new socialist order' under federal control."* – Elizabeth Lee Vliet, MD, WND, June 17, 2014

*"The US Food and Drug Administration has a long history of conducting armed, SWAT-style raids on farmers, cancer treatment pioneers, and dietary supplement manufacturers. What you see from this is a pattern of government-sponsored terrorism against innocent Americans and small business people; all done in the name of 'protecting' the public from milk, walnuts, vitamins, plants, or fruit extracts. The real reason behind all this, of course, is that the FDA has long waged a campaign of fear and intimidation against natural product providers for the sole purpose of destroying the natural products industry and thereby handing Big Pharma a monopoly over health treatment medicines."* – Mike Adams, NaturalNews.com, August 10, 2011

## INTRODUCTION

After last month's issue warned that a pandemic was coming to the US, we may see it happening. It's not Ebola – at least not yet, though it is presently spreading rap-

idly across Africa. It's not SARS. It's not the Spanish flu. At this point, we don't know what it is. A mysterious virus is spreading through the children of this country. As of this writing, more than 1,000 kids in 10 different states now have a respiratory virus – and it is spreading rapidly. The outbreak is so severe it is prompting widespread concerns that a major outbreak could sweep across the nation in the coming weeks and months. As we said last month, there is nothing within conventional medicine that can stop this virus. Nothing!

It's quite likely that this virus, which now carries the name Enterovirus D68, or EV-D68, could already be in every state in the country. We just don't know yet. What's more, we don't know what the source is. Radio talk-show hosts Rush Limbaugh and Michael Savage are saying there is a good possibility this virus was brought across the border by all those children who crossed the border illegally from Mexico. Limbaugh said, *"Obama will not tell anybody where all of the children that have crossed the border in the last four months have been relocated to. There are a bunch of people who want to know. We had these kids cross the border from El Salvador, Guatemala, Nicaragua, wherever they came from in Central America, and they were processed real quickly. They were gotten in, gotten out, and they've been distributed all over the country. And Obama won't tell anybody where he put 'em.... The regime will not announce where they are."*

Savage, who earned a doctorate in epidemiology at the University of California at Berkeley, put it in even more blunt terms. He said, *"For 20 years, I've been trying to warn America about the unscreened immigrants being brought in. Now, of course, it's coming home to roost and the American people are being lied to by the Centers for Disease Transmission. They used to be the CDC; they're now the CDT. Instead of stopping disease spread, they're encouraging it by not speaking out against bringing in infected children and putting them in our public schools, right? It's astounding to me what they can get away with because of the ignorance of the public. Common sense is gone.... What do you expect to happen if you put a kid with a certain virus into a school where they've never been exposed to that virus? It's called an epidemic breakout."*

With the Ebola virus spreading like wildfire through Africa, we very well could see a perfect storm of pandemics hitting the US within months. An article in London's *Daily Telegraph* warns that the Ebola virus *"could spread to a further 15 countries in West and Central Africa, putting up to 70 million people at risk of infection, a ground-breaking study has found."* With the potential of 70 million people in Africa carrying this dis-

ease, the likelihood of Ebola coming to the US is quite high. Air travel from Africa to Britain, continental Europe, Asia, and to the US is likely to spread this virus very quickly to the four corners of the earth. The spread of the disease into the US would overstress the medical system, which is already stressed with this other mysterious new virus (EV-D68), making the situation much, much worse. **Why has the US government just bought 160,000 full body hazmat suits? They know what is coming!**

But there's something much worse than this viral epidemic – and even much more ominous than an Ebola or influenza pandemic hitting the US. This third element would make the potential for one, two, or more pandemics an even greater risk. **It is the government not allowing you to have access to the treatments that can effectively fight these pandemics.** That is what's happening in the US right now. The US government is cracking down on doctors, naturopaths, and other medical professionals that use any treatment outside of the "accepted" norms of conventional medicine. We've detailed some of these raids in previous issues. But the attacks are becoming more widespread and vicious.

## A. THE SYSTEM TAKES OVER

As we've detailed in previous issues, Obamacare is making anything outside of the approved government system completely illegal. It has already made any insurance outside the system illegal. It will soon make any doctor outside the system illegal as well. **And it also will make any treatment outside the system illegal. Obamacare will greatly limit your ability to fight the disease.** It is doing so by coming down on alternate medicine. The military-style round-up of alternate medical practitioners is in motion. Your choices are rapidly becoming limited. This is especially true if you have cancer.

## 1. THE FDA IS NOW LINKED WITH THE FBI AND THE CIA TO UNCOVER TERRORIST OPERATIONS

This newsletter has detailed in previous issues many of the raids that have taken place in alternate medicine clinics, raw milk distribution facilities, and supplement manufacturers. These raids are continuing to happen at a rapidly increasing frequency. To understand why this is happening, you have to understand the mindset of the federal government. The book *Enhancing Food Safety: The Role of the Food and Drug Administration* was written by the federal government as a mean to justify the role the FDA now takes in preventing terrorism in the US.
