

 **scstateparks** Starfish Fun Fact: according to @natgeo, starfish have the incredible "ability to regenerate limbs, and in some cases, entire bodies. They accomplish this by housing most or all of their vital organs in their arms. Some require the central body to be intact to regenerate, but a few species can grow an entirely new sea star just from a portion of a severed limb." \* 🐠 🐡 Hunting Island State Park 📧: @alissa\_lee\_nicholson
