I would say peak will probably be around the first full week of November, or maybe even a tad later.

Hi! I was thinking of coming out to SC to visit our son and was wondering about the fall color. Our son is colorblind and can't really tell us! Is there much fall color yet in the parks? How about in the higher elevations? I haven't been able to find out much on websites. THANKS so much!

Linda, fall color is a bit behind this year, since we've had unusually warm temps. There isn't a ton of color, but things are beginning to change in the mountain areas. You can always check our fall foliage report on our website, where we post updates each week from Table Rock State Park:
