Overcome Obstacles to Agile Application Development

Wednesday, February 17th, 2016 at 2:00pm ET

Federal government agencies face intense pressure to build next-generation applications, despite resource constraints and growing requirements to incorporate security, accessibility and analytic capabilities. Rising complexity and overburdened IT systems only contribute a lack of agility – which is something government agencies desperately need to support the demand for new apps and services. Add the backlog of application change requests, inflexible infrastructures and the difficulties inherent in managing mobility and migrating to the cloud, and it's no surprise government executives feel frustrated.

Join us for this **complimentary** webinar on Feb. 17 at 2pm, to learn how you can overcome these obstacles and effectively reduce the time it takes to launch efficient and properly vetted applications that leverage the transactional data flowing through your organization today.

Speakers:

- Zahid Chaudhry, Branch Chief, Enterprise Application Development, Chief Information Office, U.S. Forest Service.
- Chris Steel, Chief Solutions Architect, Software AG Government Solutions

Please note: All webinar registrants will also receive a link to view the archived event.

Don't miss out! Reserve your spot today!

Keeping busy government business and technology leaders expertly informed since 2009. Visit www.i360Gov.com and subscribe to our e-newsletters, view our extensive library of special reports, whitepapers and informative videos, attend a webinar, or just browse our extensive line-up of up-to-date policy, business, and technology news and analysis headlines.
