LEARNING AND TEACHING

Assessment-literacy training yields positive results

(Pixabay)

Educators at a Michigan elementary school who participated in assessment-literacy training modified their tests to be more responsive to students' needs. The change resulted in more students understanding double-digit subtraction.

Strategies for assessing maker projects

(Don Emmert/Getty Images)

Educators are looking for ways to evaluate the content and context of how maker projects help students learn, Stephanie Chang, Maker Ed program director, and Chad Ratliff, director of instructional programs at Virginia's Albemarle County Public Schools, write in this blog post. They suggest ways to assess maker projects.

How tech can help create school-to-career pathways

Technology in schools can extend beyond student devices, apps and extensions, Brianna Crowley, a former teacher and instructional technology coach, writes in this blog post. She highlights a school-to-table program as an example of how technology can connect learning to career pathways.

SCHOOL LEADERSHIP

Education Dept. undersecretary shares higher-education goals

(Justin Sullivan/Getty Images)

US Department of Education Undersecretary Ted Mitchell recently shared the Obama administration's vision for higher education for its final 200 days. Mitchell focused on four areas, including creating new business models and reimagining education credentials.

TECHNOLOGY IN THE CLASSROOM

Do computers interfere with learning?

Computer policies allowing college students to use their devices in class may have negative effects on student performance, according to a study of 726 sophomores at West Point. In this commentary, psychology professor Tania Lombrozo considers this and other research, and questions whether devices interfere with learning.

POLICY WATCH

Why some middle, high schools are starting school later

With research showing middle- and high-school students would benefit from a later start to the school day, some schools are making the change. Supporters say later start times benefit student learning, but critics point to the added cost of making such changes.

ASCD NEWS

6 Myths and Misconceptions About Differentiated Instruction

"Tasks that are different from one another aren't the same as tasks that are differentiated," explains ASCD author Kristina Doubet in this podcast. Doubet and her co-author Jessica Hockett discuss some of the common ways differentiated instruction is misunderstood and misapplied, and share strategies to help teachers get started with differentiating to meet the needs of all learners. Listen to the chat to hear some key dos and don'ts for your practice. [Listen here.](#)

The tug of war between change and resistance

Resistance to change efforts in schools is natural, predictable and possible to get beyond. In this Educational Leadership article, Michael Murphy shares three effective strategies for leaders to adjust their behavior and meet resistance head on. "Better planning for the pull toward change and better

noticing of the opposing pull of resistance is the leader's job," writes Murphy. "When we change our own thinking and behaviors so we create an 'us' that accelerates change together, we can end the tug of war." [Read on.](#)
