Description /Significant Features:

Nine-span T-beam bridge carrying U.S. 301 over the North Edisto River. The bridge was constructed in 1922 and is 293 feet long. The superstructure includes haunched beams and a state-standard concrete balustrade. The substructure includes concrete bents with arched caps. The bridge was widened on one side in 1954 when U.S. 301 was widened as it passes through Orangeburg. The new portion constructed in 1954 was designed to match the older section.
