Governor Nikki Haley
Office of the Governor
1205 Pendleton Street
Columbia, SC 29201

Dear Governor Haley,

As a citizen of the three-rivers area of the Midlands in SC, I know how fragile our waterways and wetlands are -- I see it every time I'm on the water in my kayak. We have sewage, storm drain runoff, and lots of other sources of pollution threatening the well-being of our water. Coal Ash should not be one of the sources! The heavy metals and other pollution found in coal ash could ruin the health of our water for centuries!

I expect you to do everything in your power to protect wildlife habitat and clean water.

From attacks in Congress on the wildlife-friendly Clean Water Rule, to recent decisions by state leaders allowing the release of toxic wastewater into rivers, to agencies failing to protect watersheds from contaminated run-off America's waters have never been at greater risk!

You have the tools you need in the Clean Water Act, Clean Water Rule and other wildlife-friendly policies for protecting habitat and clean water.

I am calling on you to stand strong on behalf of wildlife and clean water-- and not give way to interests with ties to the agricultural and fossil fuel industries that want basic clean water protections halted or pushed aside.

Thank you.

Sincerely,

Mr. Mark Wenger
