Mr. Moore, I respectfully do not care about Political Parties.....bunch of Criminals in Suits.....I care for the health and productivity of our Citizens. You can not say these are bad ideas nor don't need to be addressed by concerned South Carolina Citizens.....Billions in two years.....Trillions in five years....All biodegradable.....I do appreciate your answer.....Hope you at least peruse information and give me your take on creating jobs, fixing roads, schools, clean diesel and gal for our Children.....Peace & Happiness!!! Give Citizens a chance to have poison and chemical free food, medicine and earth.....

Dear Mr. Loftin,  
Senator Coleman and Rep. Douglas are Democrats. I have no communications or relationship with them. I would suggest contacting the South Carolina Democratic Party.  
Matt

Governor Haley, Hemp for Mother Earth was conceived in Federal Bureau of Prisons in 2005. I have 7 ventures in penitentiary living and no one will give a Voting EX-CONVICT a chance to change perspective of Citizens on HEMP. Your speech last night should give this ex-convict a chance at redemption with good paying job by listening to my proposals to create jobs and small businesses from agriculture to manufacturing for our Citizens. Has any other Citizen of South Carolina given you as much information that is the TRUTH on Hemp? The plant is sitting empty in Hampton County that could make environmentally friendly hemp diesel and gas; then we could use the left overs to feed our livestock.

Governor Haley, The most sicken part of Hemp being legal is NO Police, Sheriff, SLED, Church Leader, Chiefs or Firemen will acknowledge nor help educate citizens to the Billions in homegrown and manufactured goods coming from Legal in South Carolina HEMP. I have written them all and you have copies of letters.

Could this Citizen have one hour of you and Michaels time so that I can explain hemp usages and what it would do the Citizens, Service Personnel and earth in S.C. while being environmentally friendly.

Portugal is coming to make wood chips to send back home for heating....Terry Walker (Clemson Bio Mass) will tell you hemp is 34,000 BTU's while wood chips are 8,000BTU's....Hemp grows two crops a year in S.C. while pine trees and such take 6 years and longer.....Citizen trying to make a difference for our Citizens to achieve. Hemp for Mother Earth, Ricky Loftin, 803-716-7315
