**Subject:** WEB SEMINAR THURSDAY, FEBRUARY 5: The Time is Now to Address Behavioral Symptoms of Dementia

---

Dear Grantees and Partners,

We wanted to make you aware of an educational opportunity through the American Society on Aging. See below for details.

**WEB SEMINAR TOMORROW: The Time is Now to Address Behavioral Symptoms of Dementia**

Behavioral symptoms of dementia tend to create the most difficulties for individuals with dementia, their caregivers, and healthcare providers. These manifestations are among the most complex, stressful, and costly aspects of care, leading to frequent hospitalizations, early nursing home placement, and increased mortality. During this web seminar on Thursday, February 5, we will explore an evidence-informed approach designed to detect and manage behavioral symptoms of dementia called DICE (Describe, Investigate, Create and Evaluate). This webinar is part of the Generations Education Series, funded in part by the Archstone Foundation. It is free and open to everyone and includes complimentary CEUs.
