SRS Watch Releases New Aerial Photos of Plutonium Fuel (MOX) Plant at Savannah River Site

MOX Construction Worker Stand Down on November 17 Due to Safety Incidents? NNSA Won't Confirm

news release posted here: http://www.srswatch.org/uploads/2/7/5/8/27584045/srs_watch_mox_photos_released_nov_21_2016.pdf

Columbia, SC – The public interest organization Savannah River Site Watch (SRS Watch) has obtained a news series of aerial photos of the unsustainable plutonium fuel (MOX) plant construction project at the U.S. Department of Energy's Savannah River Site in South Carolina and is hereby releasing them.

"As both DOE and the MOX contractor, CB&I AREVA MOX Services, are failing to release MOX photos or inform the public about the status of the mismanaged MOX project, SRS Watch is providing a needed public service and releasing the photos," according to Tom Clements, director of SRS Watch.
