Subject: Amendment to S689

Katherine,

Please let Governor Haley know we are good with passengers being required to have their feet reach the foot pegs. This was a way to handle several bills over the last few sessions that tried to deal with the age of a passenger on a motorcycle. As you may remember the bill that would have required a child car seat was one of those crazy ideas.

During the Senate Motorcycle Study Committee we came up with this as a resolution. Several states have this. We made sure that it did not say Factory foot pegs so that a owner can modify the height of the foot peg if they wanted to ride someone that may be handicapped or have some reason that they cannot reach the factory installed foot pegs.

Thanks again,

Ralph

PS I copied Dennis Welborn who is our State Legislative Coordinator to keep him in the loop.
