## The Dual View Under Door Camera

The Zistos [Dual View Under Door Camera](#) is designed to provide visual information of an otherwise unviewable situation or environment - from underneath the door. Its applications consist of hostage-barricade scenarios, dynamic entries, clearing a building's interior, and many more. It can be an invaluable tool for a tactical team.

The double hinged pole allows a tactical team member to insert the camera and pan the room while away from the door frame and outside of the fatal funnel...
