South Carolina State Parks

at 12:00:00 on 4/02/2014 UTC

DID YOU KNOW? The Bobcat is a highly adaptable wild cat who can thrive in close proximity to humans. They have excellent camouflage from their coat which can be spotted and/or striped. Bobcats prefer to hunt by lying in wait for their prey and then leaping on it from as far as 10 feet away. Their preferred prey are smaller animals such as rabbits, mice, and birds, but they have been known to take down much larger animals such as deer as well. Come out to Charles Towne Landing to check out our resident bobcats! www.southcarolinaparks.com/ctl

Nancy Blizzard Jeffers They love. To eat goats!

at 14:07:10 on 4/02/2014 UTC

Meaghan K Poyer They're always hiding too well when I come to visit.
