

Gov. Hailey

Congravulation on your re-election

I have an issue on the 85 percent, that over crowding the prison system. Just a idea on the solution for the Over Crowding in the prison system Drop the 85 percent to 70 percent, and those who are non-Volient offender do 65 percent and 50 percent with good behavior and work Credits. This year change can be made. Every since South Carolina adopted the 85 percent in 1995 the crime rate has rise almost more than 20 percent in the last Decade. The system use to be a revolving door, now it just a Storage house were the state is locking up the Minority on Drug and Classify Drugs Dealer as Volient people "War on Drugs" really mean "War on Black people." as the Low rate of Education, and the Highest rate of incarceration, they don't make any sense. Let get it right this time.
