Subject: RE: Tech college funding

Sorry for the delay, y'all.

Suggested Quote:

“Ensuring our workforce meets the demands of the state has always been a top priority, which is why we proposed funding for tech school programs such as ReadySC and Pathways, and signed the Capital Reserve bill appropriating nearly \$65 million in capital projects for tech schools across the state. But the money South Carolina collects from taxpayers is finite and must be prioritized across all of government—therefore the tech schools, like every other state entity, cannot get everything they request in the budget.”

Background: Beyond her support for tech schools in the budget, Governor Haley has produced recruitment videos for each of the 16 tech schools and works with private industry to encourage them to donate equipment to these facilities, relieving the taxpayer of the capital cost.

By some quick back of the envelope math, the FY 2016-17 Capital Reserve Bill (H.5002) appropriated nearly \$65 million for 17 different Tech school capital projects, none of which were vetoed by the Governor. That is the proper vehicle for funding capital improvements, not a higher-ed bond bill.

Hi,

I cover higher education for the Independent Mail and have been curious for a while now about spending on tech colleges. Several of the campuses have long standing capital improvement needs and there's never much money for them to do much work.

The governor has been firmly against a bond bill, but is she open to find other ways for the state to get more financial resources to the tech schools? She, Bobby Hitt and everyone always say are how vital they are to the state's economic development efforts.

In short, where does the Governor stand on taking care of capital improvements for these schools?
