Subject: Sen. Fair's Press Statement

Attachments: Concussion Bill Talking Points Signing.docx

Katherine and Jeff:

Harry Davis' ROUGH talking points are attached.

Here is Sen. Fair's statement. Please feel free to edit for context.

During my time as a former USC quarterback, I had several concussions. Research now tells us that when a young person gets even a single concussion, there can be life-long effects. The unanimous passage of this bill in the General Assembly and the Governor's resounding support mean that we will now have model protocols across the state to prevent, recognize, and treat head trauma in student athletes. The Joint Citizens and Legislative Committee on Children was proud to endorse this legislation to help our young people be safer than ever before.

I will be in touch with Dr. Herring and get you his info next.
