Subject: Coordination Plan

Tony,

I know my team has been having ongoing discussions with members of your own regarding ongoing coordination activities. I wanted to give you a heads-up that we are awaiting MMO approval for a contract modification to our current Statewide Multimodal Transportation Plan to include a State Human Services Transportation Infrastructure Review, with specific attention on the state's NEMT infrastructure. Alternatives to the current model will be addressed, with possible recommendations for a preferred alternative to the current statewide, interagency coordination model. We have discussed this study with DHHS and they are on board.

We will provide additional information and bring the Interagency Council back together upon receipt of MMO approval and initiation of the study.

Thanks,
Doug
