**“Hypocrisy in a Democratic Society”
By Wilhelmina P. Johnson
Darlington County Council**

Hypocrisy in a Democratic Society is hard to take. South Carolina State University with a legacy of 119 years is being destroyed without any awareness of proper management, leadership and evaluation that should have been a part of the Government Roles on all Levels of Leadership. It is hard to believe the **Damage to South Carolina State University** recently on the “announcement of the Closure of this Public African-American Institution for Two Years.” It is hard to believe that this time when the country is stressing “Human Rights” abroad that our government leaders are not sensitive to the needs and desires of people here at home without regards to race, color, creed, sex, religion, or national origin.

Our governmental system is so structured that the different levels can interpret the laws in such a way that it is devastating to those without direct input in the decision-making process. A law is not effective unless it is utilized with consideration given to the positive and negative effects it will have on the people.

This is not the time to play the “Blame Game.” South Carolina State University is in the Healing Stage with Government and Educational Leaders working Together on All Levels to continue the Legacy of 119 years. We Have a Job To Do Together for South Carolina State University. “We must keep it positive!” The \$100 Million Campaign for South Carolina State University is a Reality!!!
