

Dear Governor Haley,

My name is Thomas Anders and I live on Lake Katherine in Columbia, SC. I have noticed and been pretty annoyed by the amount of litter and trash that is in the lake here. It's very very noticeable. Lately, I have had a science project to make an ad concerning plastic in the lakes and oceans. Even though I live on the smaller body of water, it seems like it matters less. People think "oh... this isn't important, I'm gonna throw trash in it". I want to change that. I want to change how people think and throw trash into anywhere except the trash can. I want there to be no trash in the lakes or any body of water. I want to thank you for listening to my statement and let's see how this goes.

Sincerely,

Thomas Anders 

"You can't change the past or make it better, but you can change the future and make IT better" ~Thomas Anders
