Subject: FOIA due from Travis James Bennett re. Sandbags
Location:
When: 12/16/2015 - 12/17/2015

Travis James Bennett (employer unknown) has submitted multiple FOIA requests through MuckRock to our office, DHEC, National Guard Bureau, and the City of Columbia. The City already responded with this: "Columbia Silica Sand provided the fill dirt. This was coordinated by the contractor."

I believe that our office will not possess any records responsive to this request.

Request:

Requesting the address(es) of property(ies) from which the fill material was taken for the sandbags that were used to repair damage to the Columbia Canal after the torrential biblical rains in September - October 2015.

Recall that the South Carolina National Guard performed much of the work.
