

17 MAR 2015

Dear Governor,

I hired some geniuses to help me figure some problems so I'm writing to you to tell you the results. If you put in the newspaper have the state Attorney General do it. Please send in idea on how to stop human slavery in Sic. and drug trafficking and women and child abuse too. They will phone in ideas that work damn good. Some want money for ideas but ~~but~~^{they} guarantee results and they don't want too much money for the ideas that work. Please tell the AG of Sic. to tell the U.S. AG that information and ask him to tell the world to do the same thing. Again that works damn good luck!

Sincerely

The cheapest bridge I ever heard of is two I beams set in concrete angled so the rain will run off. Then steel decking welded on top. You bolt I beams together with steel plates on the I beams placed from top to bottom on the inside of the I

over

beam. You can bolt 4 I beams together that way. Once you get it all together you weld plate steel together for the sides. Painted they look real nice and won't rust. When you buy materials you put ads in the state's newspapers saying wanted to buy some I beams and plate steel to get a competitive rate.

On the ads they should read like this:

Wanted; ideas on stopping human slavery, drug dealing and women and child abuse in South Carolina with the phone number of the state attorney general's office

Would you please call the state D.O. to office and ask them to slow down traffic on I 85 in Greenville, county. to 60 MPH people have wrecks on I 85 about once every 3 days people just can't drive at 70 MPH ~~there~~ their reflexes just ain't fast enough. Plus they follow to close too. Good luck
