U / 1306.07 Revisit: ☐  
Status Site No.  
Quadrangle Name: Stallville  
Tax Map No.: 1790000002000

## Survey Form

### Identification

Historic Name: Gregg's Mine Road  
Common Name:  
Address/Location: extends 2.10 miles west from SC Highway 61 before ending at Road 1306.04 in the south-central portion of the project tract  
City: North Charleston Vicinity of ☒ County: Dorchester

Ownership: Private Category: Site  
Historical Use: Transportation Historical Use (if Other):  
Current Use: Transportation Current Use (if Other):  
SHPO National Register Determination of Eligibility: Not Eligible

### Property Description

Construction Date: c. 1870  
Construction: Construction (if Other):  
Historic Core Shape: Historic Core Shape (if Other):  
Exterior Walls: Exterior Walls (if Other):  
Foundation: Foundation (if Other):  
Commercial Form: Commercial Form (if Other):  
Roof Shape: Roof Shape (if Other):  
Roof Materials: Roof Materials (if Other):  
Stories: Stories (if Other):  
Porch Width: Porch Width (if Other):  
Porch Shape: Porch Shape (if Other):

Description/Significant Features: Road 1306.07 (Gregg's Phosphate Mining Road) extends 2.10 miles west from SC Highway 61 before ending at Road 1306.04 in the south-central portion of the project tract (see Figures 3.21 and 3.22). Road 1306.07 averages 20 ft wide and 20-30 ft amsl elevation and its surface is an aggregate of dirt and gravel. For most of its course, the roadbed is at ground level, except in wetlands where it is raised three to six ft above ground surface. Ditches flank both sides of the raised roadbed where it extends through the remnants of hand- and mechanically-excavated phosphate mines associated with Resource 1323.

Alterations (include date(s), if known)

Architect(s)/Builder(s):

**Historical Information**

Historical Information: These investigations identified three historic roads (1306.05-1306.07) from Watson Hill's phosphate era, circa 1866-1924. These roads linked the former Charleston Mining and Manufacturing Co. and Gregg phosphate mining operations on the Ashley River with mines on the project tract. It is likely these phosphate mining operations utilized extant infrastructure such as Roads 1306 and 1306.04. In turn, twentieth century silvicultural enterprises adapted Roads 1306.05-1306.07 as part of their infrastructure.

It is possible Road 1306.07 functioned first as one of the Gregg phosphate mine's tram lines (Resource 1323.01) Portions of an old tram line extend southwest from the terminus of Road 1306.07 and straight where Road 1306.07 intersects Road 1306.03 near archaeological site 38DR314. The USGS (1920) topographic map and Rhett's (1928) plat of Wragg Barony are the earliest maps to show Road 1306.07 (see Figures 3.6 and 3.15). Later USGS aeriels and topographic maps show Road 1306.07 integrated into the logging road network (USGS 1957, 1959, 1973, 1980).

Source of Information: Rhett 1928; USAAA 1938; USGS 1920, 1957, 1973, 1980
