Subject: See Who's Visiting Your Site

We have the ability to target those looking for your company, your services and your competitors as they navigate the rest of the Internet, plus a brand new feature that aides in your lead generation. Our Targeted Campaigns not only directs traffic to your website through programmatic ads, but we can convert all site traffic into real leads for your company.

We provide the following information on all site traffic, not just traffic we've generated for you; this information includes:

- What company visited your site.
- Their phone number.
- The number of pages they visited on your site.
- Which pages were viewed.
- The total amount of time spent on your site.

With this information, you will know which leads are coming to your site and what they are most interested in, giving you the upper hand when you reach out to these potential clients.

Do you have a moment in the next 30 minutes to discuss this opportunity?

Best regards,

Jeb Brost
