We would like to tent camp soon, but would prefer to not use the restroom facilities yet.... We usually have an emergency portable potty at our site for nights, but have never taken our shower out yet to a more.....socialized tent site...--are tent campers with a water hookup allowed to use a portable shower room with bio soap? We have a propane water heater (camp chef Triton) and would like to be able to setup at our site to take further precautions with everything still going on. Not sure if this is a setup campers sometimes use on a site that is not on back trails....we would probably only be camping 2 nights.
