There is a large fire in Myrtle Beach of approximately 60 acres.with a potential of damaging a utility line if the fire expands. There is considerable smoke in the area, which has received media attention.

State Response: The Forestry Commission (personnel and equipment) are on site. National Guard water helicopter support may be requested.

County Response: EMD has been in touch with Horry County, but no other state assistance has been requested. DOA may provide additional communications support if needed.

Expect further updates.
