Re: Fresenius Medical Care North America (FMCNA)

To Whom It May Concern:

FMCNA owns and operates freestanding dialysis facilities across the United States. A list of addressees and Provider Numbers of FMCNA dialysis facilities in the state of SC is enclosed as Attachment "A" (the "facilities").

We recently completed a compliance audit pertaining to billings during the timeframe of May 15, 2005 – December 31, 2005, relating to certain services furnished at dialysis facilities owned or managed by FMCNA. We determined that in some instances, using the principles found in the Medicare billing rules, one or more of our facilities was overpaid for these services. Since some of these overpayments involve payments received from your program, we are writing to inform you of our findings and issue a repayment.

Briefly, the following audit identifies findings for which repayment is being made:

Validation Stop:

Background

The Data Entry Error Report (DEERT) was developed in 2004 to identify potential errors by comparing medications entered into the Proton Drug Therapy Order Screen with medications entered into the Proton Medications administered screen. If the patient's drug therapy order did not match the patient's drug therapy administration on the following seven items: date range; medication procedure code; dose; route; measurement; ICD-9 code; and supply by code, then the order/administration was considered to be a potential error. The periodic release of this report (twice a month) was designed to enhance the field's ability to identify and correct data entry errors. The DEERT program did not prevent the facility from interfacing Proton with Medical Manager.

The Medication Validation Stop Routine was implemented during the fourth quarter of 2004. As a result, the facilities could no longer complete the daily interface process for any of the medications included in the program until all variances were cleared. The Medication Validation Stop Routine eliminated the need for the DEERT report being distributed to the field.

Objective and Scope

The objective of this audit is to confirm the continued effectiveness of the Validation Stop Routine. The period under review is medications administered May 15, 2005 through December 31, 2005.

We used the results from a random sample of paid claims for the time frame above, to extrapolate an overall repayment obligation to both primary and secondary payors. We calculated an overpayment amount due to your program based on the prevalence of claims paid on behalf of your plan members during 2005.

In these instances, where we performed an extrapolation of an error rate derived from a statistical sampling of claims, as a result of a specific known or suspected error, we are unable to directly refund the payments to the payor through the normal channels. Specific beneficiary names, dates of service, and insurance plan are not available. For these audits, we provide an explanation of the audit, and repay the funds by check.

As a result of the audit, we are contacting applicable payors and making repayment based upon the extrapolated audit findings. We are returning a total of \$ 37.19, to cover estimated overpayments for services furnished to members of your program.

Should you have any specific questions you may contact Jennifer Hutton Sealise, Manager of Compliance Operations at 781-699-9358.

Sincerely,

Jonathan Glazier, J.D., M.B.A.
Director of Corporate Compliance
