

Asyra PRO

The original concept for interfacing Resonance Analysis technology with the human body was brought about by Dr. Reinhold Voll in the early 1950's (E.A.V.). He collected data from thousands of pre-diagnosed patients to understand how to interface the technology appropriately. The amount of current that passes through the cellular structure of the organ, gland, or system reveals the functional status of the tissues. Because the assessment is based on defined parameters of health, any deviation from this standard can be readily detected. This allows us to see a true picture of how your body is actually functioning. Once we have identified the problem areas in the body, we pre-screen potential therapeutic options. We send representative electromagnetic signatures of remedies to the body and measure its response...

"This allows us to monitor how you respond to a remedy before it is given." -Reinhold Voll, M.D.,M.Sc.

The Asyra PRO analyzes the impedance and reactive capacitance of the body's energetic fields. The underlying mathematical formulas were originally applied by Dr. Tiller PhD and a material scientist with Stanford University and have been adapted specifically to this system. According to homotoxicology research by Hans-Heinrich Reckeweg M.D. disease processes first alter the body's energetic field and if left unchecked eventually lead to chemical changes and then finally to tissue destruction and/or disease.

More than 70 percent of patients in any general practice suffer from functional disturbances. Simply speaking, a functional disturbance occurs when no specific tissue or organ damage can be identified by conventional lab work or other pathological diagnostics, yet the patient still experiences a myriad of symptoms. Functional medicine helps detect and identify these energetic and regulatory disturbances. Functional disturbances can be detected early- even from the very beginning of a preclinical phase (when you display symptoms, but nobody can identify their cause). Disease does not begin with pathology, but with a preclinical phase. Functional disturbances occur when a living organism can no longer compensate adequately for changes in the environment. Environmental changes include both internal conditions of the body and external circumstances. Ideally, it would make good sense to assess a patient using functional evaluation methods and treatment protocols. These methods have shown effective in not only helping to identify and correct preclinical disorders and symptomology, but also in reducing or even reversing morphological and pathological deterioration. Functional medicine is intended to bridge the existing diagnostic and therapeutic gaps. Backed by over 40 years of research, this technology clearly continues to deliver life-changing results. Economically, considerable time and substantial amounts of money could be saved simply by taking advantage of the benefits of this powerful technology in the emerging field of functional medicine.

Re-establishing balance to the energetic pathways (that run through all organs, glands, and tissues) may hold the key to restoring and maintaining optimum health. This approach is not looking for any particular disease state, and therefore no claims of diagnosis can be made.

If you would like to view some of the published research go to www.asyra.com.

Imprinting or Digital Homeopathy is a difficult concept to understand. It is even more difficult to write about - but as this is the future of Medicine, here goes:

The website (digibio.com) of the late Jacques Benveniste M.D., provides irrefutable scientific proof that vibrational exchange is the language of biochemistry - this is the concept that underlies the paradigm of Homeopathy. As doctors we are taught that molecules we administer to you (drugs, vitamins, hormones, co-factors, etc.) "work" by binding to specific receptors on the cell membrane, triggering a change within the cell - a "drug" or biological effect. This is the structural matching paradigm.

When you think about it, it makes sense for our cell membranes to have specific receptors for hormones, vitamins, and other "normal human" substances, but does it make sense for our cells to have receptors for drugs? Why should Nature or Evolution provide us with receptors for molecules that haven't been invented yet?

In the vibrational paradigm, the paradigm of Imprinting or Homeopathy, the molecules that we give you as well as the molecules produced in your body (the molecules that govern your physiology) work not by binding to a specific anatomic receptor on the wall of a cell, but by emitting an electromagnetic signal or signature, vibrating at a specific frequency, termed "resonance frequency," that can be sensed and responded to by the cells of your body. Drugs work not by binding to the cell, but by getting close enough to the cell so that their resonance frequencies can be picked up and responded to.

If this concept were true, then it follows that giving you a "therapeutic molecule" would not be necessary, we could instead give you the resonance frequency of that molecule. In Homeopathy we do not bother to give you the structural molecule that emits the frequency of interest; we simply give you its resonant frequency, but in concentrated, or "potentiated" form.

The physics by which serial dilution concentrates frequencies is difficult to understand. Suffice it to say that removing from solution a molecule that once emitted a frequency creates an entity called a hyperproton, basically concentrated energy. Dr. Benveniste demonstrated that the frequency given off from a given therapeutic agent could be recorded, digitized, emitted or imprinted into a liquid medium and then given to a biological system to generate a biological effect - the same effect that would occur if the original molecule was administered in intact form. This is Digital Homeopathy or Imprinting.

The Asyra contains tens of thousands of specific frequencies in the hard drive of the computer. These frequencies can be transmitted into you via the Asyra for the purpose of evaluation. The specific frequencies that your body finds of value can then be Imprinted into a carrier solution. When you place drops of the imprinted solution under your tongue, the specific frequencies enter your body, distribute through your energetic nervous system, and stimulate your cells to respond. In essence it is a software program for the innate intelligence or energetic being that stimulates it to direct the physical tissues to adhere to an optimum pattern.

Homeopathy is based on "like cures like" or, something in chemical form will cause "x,y,z" symptoms while the energetic pattern will stimulate the body to correct or cure those same "x,y,z" symptoms. A common example is mercury; in the chemical form it has an affinity to lodge in the central and peripheral nerve tissues causing numerous symptoms, in the energetic form it stimulates the body to remove the mercury thus eliminating those same symptoms. Another example is China Officinalis (Peruvian bark) if ingested in the chemical form it creates all the symptoms of Malaria, in the energetic form it stimulates the body to counteract or correct those same symptoms and adhere to an optimized blue-print or pattern.

Comprehensive Analysis, Allergy-Sensitivity Profile, Hormonal Profile, Toxic Stressors, Neurotransmitter Profile, Nosode Susceptibility, Metabolic-Digestive Profile, Nutrient Deficiency (generic), Nutritional Maintenance (generic)

GIBSON, ASHA

Date May 20, 2013 4:34 PM

Amplification Level: 14

Gender Female

DOB 1/4/1972

Filter Test / Balancing Item

Dilution

☐ Amino Acid Deficiencies (generic) (68)

☒ Cysteine / L-Cysteine

Multi-Chord

Functions as building block of all proteins, eliminates certain toxic chemicals rendering them harmless (anti-oxidant), and is one of the amino acids containing sulfur in a from believed to inactivate free radicals thus protecting and preserving cells. Speculated Benefits: helps build muscle, burns fat, protects against toxins and pollutants, combats arthritis, amd may participate is some forms of DNA repair and theoretically extend the life span.

☐ Bio-Availability Disruption (37)

☒ Energy Balance

Multi-Chord

Bioavailability is a measurement of the extent of an item to reach the systemic circulation for transport to become available at the needed site of action.

☐ Cell Permeability (79)

☒ F-Class Pumps

Multi-Chord

Uses H+ gradient in order to produce ATP. Can also work in the reverse direction.

☐ Cell Salt Imbalance (72)

☒ Natrum Phosphoricum

Multi-Chord

Metabolic acid remover; all conditions that result from an incomplete breakdown and elimination of metabolic acid waste. (Lactic and uric acid). Gastric and urinary acidity, gout, fibrositis, degenerative arthritis, and fat intolerance may be observed. A remedy for conditions arising from excess of lactic acid, often resulting from too much sugar. Ailments, with excess of acidity.

☐ Cell Salt Imbalance (32)

☒ Silicea

Multi-Chord

Calcium reorganizer; abnormal nutrition and calcification of bone, tendon, ligament or cartilage. Articular or periarticular degenerative changes. Silicea also facilitates the removal of pathogenic waste from the body. Imperfect assimilation and consequent defective nutrition. It goes further and produces neurasthenic states in consequence, and increased susceptibility to nervous stimuli and exaggerated reflexes. Diseases of bones, caries and necrosis. Silica can stimulate the organism to re-absorb fibrotic conditions and scar-tissue.

☐ Chemical Toxicity (71)

☒ Bridged Ring

Multi-Chord

Homeopathic desensitization/detoxification of the body from chemicals having a bridged ring system as a base. These are often found in insecticides and can be neurotoxic.

☒ Stressed

☐ Weakened

☐ Symptomatic / Causal

☒ Balanced

☐ Retest

1 of 6

Heptachlor isode 12x

Initially stimulates the central nervous system, continued contact may result in depression or paralysis.

Endosulfan isode 12x

No toxicological data was available; however, its structure is so similar to that of Heptachlor that it most certainly affects the central nervous system as well.

 Chemical Toxicity (72)

 Butylated Hydroxytoluene

Multi-Chord

Homeopathic desensitization/detoxification of the body from BHT, which is a common food preservative found in items from soups to cold cereals.

 Chemical Toxicity (40)

 Solvent Group

Multi-Chord

Homeopathic desensitization/detoxification of the body from solvent chemicals. These are any product that is easily absorbed through the skin such as: cleaning agents, bug spray, air fresheners, etc.

 Chemical Toxicity (64)

 Thio Group

Multi-Chord

Homeopathic desensitization/detoxification of the body from sulfur containing compounds. Found commonly as sweeteners, chemicals and cosmetics.

Thioglycolic acid isode 12x

Widely used industrially as a sulfur donor in chemical synthesis. It is also found in some cosmetic products.

Thiocetamide isode 12x

Used industrially as a sulfur donor in chemical synthesis.

Aspartame isode 12x

Reduced calorie sweetener linked with symptoms such as gastro-intestinal distress, allergies, headaches, anxiety, irritability, depression, dizziness, insomnia, fatigue and seizures.

Cyclamate isode 12x

Non-nutritive sweetener removed from the market when it was linked to cancer in rats.

 Chemical Toxicity II (80)

 Amphetamines

Multi-Chord

Homeopathic combination that aids in detoxification of the chemicals in this family, including: pharmaceuticals, OTC (over-the counter) medications, and illegal drugs.

 Chemical Toxicity II (40)

 Inhalents

Multi-Chord

Homeopathic combination that aids in detoxification of the chemicals in this family, including: pharmaceuticals, OTC (over-the counter) medications, and illegal drugs.

 Chemical Toxicity II (58)

 Steroids

Multi-Chord

Homeopathic combination that aids in detoxification of the chemicals in this family, including: pharmaceuticals, OTC (over-the counter) medications, and illegal drugs.

 Color Filters (40)

 Indigo

Multi-Chord

Diseases treated with indigo:

Appendicitis, bronchitis, cataracts, convulsions, ear difficulties, eye diseases, hyperthyroidism, insanity, lung trouble, nervous ailments, nasal diseases, nose bleed, obsession, palsy, paralysis-facial, pneumonia, throat diseases, tonsillitis, whooping cough.

 Dietary Concerns (38)

 Stressed

 Weakened

 Symptomatic / Causal

 Retest

2 of 6

Re-establishing balance to the energetic pathways (that run through specific organs, glands, and tissues) may hold the key to restoring and maintaining optimum health. This approach is not looking for any particular disease state, and therefore no claim of diagnosis can be made.

☒ Type "O" Plan

Multi-Chord

Type "O" diet - Refer to Eat Right 4 Your Type by Dr. Peter J. D'Adamo with Catherine Whitney.

☒ Digestive Maladies (72)

☒ Carduus Combination

Multi-Chord

Provides Homeopathic regulation to the body assisting homeostasis from symptoms of liver afflictions with flatulence, indigestion, bile duct or gallbladder inflammation, gallstones or metabolic dysfunction of the liver.

A. Rationale

Carduus Combination has been formulated for the treatment of functional disorders of the liver, damage to the liver parenchyme, hepatitis-including viral, acute, bile duct or gallbladder afflictions including gallstones with and without colic.

☐ Enzyme Deficiencies (generic) (38)

☒ Cellulase

Multi-Chord

An enzyme that assists in breaking down fiber and other nutrients. Cellulase also helps break down cellulose into glucose, providing a source of supplemental energy.

☐ Fatty Acid Deficiencies (generic) (31)

☒ Alpha-Lipoic Acid

Multi-Chord

A fatty acid that can aid with the endocrine system, cardiovascular system, joints, skin, and the function of the nervous system.

☒ Food Sensitivities (62)

☒ Meat Antigens

Multi-Chord

For desensitization of reaction to any protein food source.

☒ Fungal Signatures (67)

☒ Arthrimum

Multi-Chord

☒ Harmful Energies (69)

☒ Electromagnetic

Multi-Chord

Symptoms that can occur from harmful energies include: sleep disorders, nightmares, feeling worn-out in the morning, chronic fatigue, fibromyalgia, autonomic disorders, migraines, tension headaches, muscle cramps, no progress despite 'proper' treatment, hormonal disorders, ADD, and difficulties to learn or concentrate.

☒ Harmful Energies (69)

☒ Radioactive Exposure

Multi-Chord

Symptoms that can occur from harmful energies include: sleep disorders, nightmares, feeling worn-out in the morning, chronic fatigue, fibromyalgia, autonomic disorders, migraines, tension headaches, muscle cramps, no progress despite 'proper' treatment, hormonal disorders, ADD, and difficulties to learn or concentrate.

☒ Heavy Metal Burden (74)

☒ Barium

Multi-Chord

Barium compounds, and especially barite (BaSO₄), are extremely important to the petroleum industry. Barite is used as a weighting agent in drilling new oil wells. A weighting agent is a material that adds body to petroleum. Barium sulfate is also a good X-ray absorber, used in X-ray diagnostics.

☒ Heavy Metal Burden (72)

☒ Bismuth

Multi-Chord

Extensively used in cosmetics and some medicines.

☐ Heavy Metal Burden (31)

☒ Copper

Multi-Chord

Refer to Cuprum Metallicum (detox for Copper) in the Homeopathic Materia Medica for complete

symptom picture.

☐ Heavy Metal Burden (57)

☒ Strontium

Multi-Chord

Its primary use is in glass, cathode ray tubes, magnets and the refining of zinc.

☐ Heavy Metal Burden (23)

☒ Titanium

Multi-Chord

Refer to Titanium Metallicum (detox for Titanium) in the Homeopathic Materia Medica for complete symptom picture.

☐ Hormonal Imbalance (67)

☒ DHEA

Multi-Chord

The most abundant sex hormone in the body, DHEA is made in decreasing amounts as we age and can also be lowered by low-fat or vegetarian diets. Research shows DHEA lowers blood cholesterol and cardiac risks, protects against the extra pounds that we all fight after forty, strengthens bones, improves memory, and increases feelings of well being. DHEA may also boost the immune system, protect against diabetes, favorably impact arthritis, and improve mental acuity. After being secreted by the adrenal glands, DHEA circulates in the bloodstream as DHEA-sulfate (DHEAS) and is converted as needed into other hormones. As much as half of testosterone in men and about three-quarters of estrogen in women (and close to 100% after menopause) are derived from DHEA.

☐ Hormonal Imbalance (41)

☒ Hypothalamus Gland

Multi-Chord

This gland is considered one of the controlling glands for hormone production and regulation; especially for the autonomic nervous system.

☐ Hormonal Imbalance (66)

☒ Thymosin

Multi-Chord

A hormone that restores T cell function.

☐ Hormonal Imbalance (61)

☒ Thyrotropin

Multi-Chord

Produced by the anterior lobe of the hypophysis that stimulates the growth and function of the thyroid gland.

☐ Immune System (41)

☒ Core Maca Gold

Multi-Chord

Organic and wild-crafted Maca.

Increases libido
Resolves menopausal symptoms
PMS correction
Female hormonal balancer
Male hormonal balancer
Anti-depressant
Chronic fatigue
Natural alternative to anabolic steroids
Increases stamina
Mental clarity
Memory enhancer
Immuno-stimulant
Fertility support
Hypothalamic support

☐ Mental or Emotional Stress (41)

☒ Bauhinia

embracing new concepts and ideas. Acceptance and openmindedness.

☐ Metabolic Disruption (72)

☒ Catabolism Balance

Multi-Chord

Catabolism breaks down large molecules, for example to harvest energy in cellular respiration.

☐ Metabolic Disturbances (59)

☒ Gelsemium Combination

Multi-Chord

Provides Homeopathic regulation to the body assisting homeostasis from symptoms of exhaustion, anticipation nervousness, headaches, spinal pains, and general body aches and fatigue.

A. Rationale

Gelsemium Combination has been specifically formulated for headaches, migraines and neuralgic pain particularly when associated with the cervical portion of the spine. This remedy also includes, among the symptoms of its picture, fever, exhaustion, body aches and skin eruptions which makes it very valuable in the treatment of influenza, viral infections, measles, herpes and Epstein Barr virus for which this remedy is an excellent similia. It is an excellent remedy for the symptoms of flu and lends itself to the treatment of chronic conditions arising from viral infections.

☐ Mineral Deficiencies (generic) (75)

☒ Boron

Multi-Chord

☐ Mineral Deficiencies (generic) (64)

☒ Magnesium

Multi-Chord

A vital catalyst in enzyme activity, especially the activity of those enzymes involved in energy production. It assists in calcium and potassium uptake. A deficiency of magnesium interferes with the transmission of nerve and muscle impulses, causing irritability and nervousness. Supplementing the diet with magnesium can help prevent depression, dizziness, muscle weakness and twitching, and premenstrual syndrome (PMS), and also aids in maintaining the body's proper pH balance. It is necessary to prevent the calcification of soft tissue. The essential mineral protects the arterial linings from stress caused by sudden blood pressure changes, and plays a role in the formation of bone and in carbohydrate and mineral metabolism. Also helps to conduct nerve impulses for normal heart rhythm and contraction of muscles.

☐ Neurological Imbalance (61)

☒ Acetylcholine Chloride

Multi-Chord

ACC is used for control of sensory input and muscular output signals, memory, control of mental focus, sexual activity, and it is needed for the smooth flow of nerve impulses. In therapy it is used for: fatigue, depression, phobias, schizophrenia, memory impairment, migraines, and to lower blood pressure. It also reduces sensitivities to cigarette smoke, and chemicals.

☐ Neurological Imbalance (24)

☒ Phenylethylamine

Multi-Chord

Phenethylamine (β -Phenylethylamine) is an alkaloid and monoamine. In the human brain, it is believed to function as a neuromodulator or neurotransmitter.

☐ Oxidative Stress (69)

☒ Hypochlorous Acid

Multi-Chord

Formed from H₂O₂ by myeloperoxidase. Lipid soluble and highly reactive. Will readily oxidize protein constituents, including thiol groups, amino groups and methionine. The best studied cellular antioxidants are the enzymes superoxide dismutase(SOD), catalase, and glutathione peroxidase.

☐ Phenolic Sensitivities (39)

☒ Acetaldehyde

Multi-Chord

Indications: Petrochemical sensitivity, perfumes, flavors, dyes, plastics, synthetic rubber, alcohol, spreading phenomenon of allergies to foods, sugar metabolism and candida disorders. Sources: Car exhaust, perfumes, flavors, aniline dyes, synthetic rubber, produced in body, and occurs naturally in the following foods: cowsmilk, apple, avocado, banana, blackberry, blueberry, broccoli, chili powder, corn, cucumber, eggplant, grape (red and green), grapefruit, haddock, honey, hops, mushroom,

☒ Stressed

orange, peach, pear, pineapple, strawberry, tomato, watermelon, yeast mix, cooked beef, cooked chicken, and cheese.

☐ Phenolic Sensitivities (39)

☒ Octopamine Multi-Chord

Indications: petrochemical sensitivities, headaches, mental sluggishness, and indigestion. Occurs naturally in the following foods: clam, ham, lobster, cows milk, mustard seed, mutton, onion, pork, and numerous shellfish.

☐ Phenolic Sensitivities (24)

☒ Phenylalanine Multi-Chord

Indications: chest congestion, mental sluggishness, inability to concentrate, behavior and mood swings. Occurs naturally in the following foods: skim milk, barley, cocoa, codfish, cranberry, egg, gelatin, green and red grape, hops, potato, sweet potato, and yeast mix.

☐ Polarity Disturbance (39)

☒ Polarity Balancer Multi-Chord

This remedy balances the electromagnetic systems of the body. Polarity relates to the direction and rate of spin of the electrons as they orbit the nucleus. If the orbital pattern or the spin of the electrons is incorrect, the cells can't process information correctly. If we compared the body to a computer, this would be like trying to process data for a Macintosh computer using IBM software; many systems won't operate effectively and the data that is there, the body doesn't know how to handle it. This remedy resets and restores proper balance to the energetic/electromagnetic patterns of the body.

☐ Skin Afflictions (33)

☒ Clematis Combination Multi-Chord

Provides Homeopathic regulation to the body assisting homeostasis from symptoms of neuralgia, rheumatic pains, dermatitis, edema, eczema and activates the body's general healing processes.

A. Rationale

Clematis Combination has been formulated to activate the body's healing processes in cases of chronic diseases. Conditions such as arthritis, rheumatism, neuralgia, asthma, hepatic disorders, colitis, various neurological conditions, urological, dermatological, ear, nose and throat conditions may be treated with Clematis Combination.

☒ Thyroid Disturbance (75)

☒ Dandi Blend Multi-Chord

Agrimony, Barley, Beets, Celandine, Dandelion, Licorice Root, Milk Thistle, Cilantro, Boldo, Cascara Sagrada.

ALL liver problems (decongests and repairs)
Cirrhosis
Hepatitis
Jaundice
Gout
Fatty liver
Thyroid (hormones are conjugated in the liver)
Spleen congestion
Psoriasis
Hypoglycemia
Blood purification
Rheumatism

☐ Vitamin Deficiencies (generic) (42)

☒ Choline Multi-Chord

Choline is a nutrient, essential for cardiovascular and brain function, and for cellular membrane composition and repair.

☒ Stressed ☐ Weakened ☐ Symptomatic / Causal ☒ Balanced ☐ Retest 6 of 6

Re-establishing balance to the energetic pathways (that run through specific organs, glands, and tissues) may hold the key to restoring and maintaining optimum health. This approach is not looking for any particular disease state, and therefore no claim of diagnosis can be made.

Kidneys Resonance		
Large Intestine Resonance		
<p>The large intestine is the lower part of the digestive tract and is connected to the small intestine. Its function is to absorb the remaining water from indigestible food matter and then eliminate the wastes from the body. The large intestine houses over 700 species of bacteria that perform a variety of functions; these bacteria also produce small amounts of vitamins, especially vitamin K and vitamin B, for absorption into the blood. The normal flora is also essential in the development of certain tissues, including the cecum and lymphatics; they are also involved in the production of cross-reactive antibodies. These are antibodies produced by the immune system against the normal flora that are also effective against related pathogens, thereby preventing infection or invasion. The most prevalent bacteria are the bacteroides, which have been implicated in the initiation of colitis and colon cancer. Bifidobacteria are also abundant, and are often described as 'friendly bacteria'. A mucus layer protects the large intestine from attacks from colonic commensal bacteria.</p> <p>Symptoms may include: gas, bloating, abdominal pain, mild cramps in the lower abdomen, urgency for bowel movements, severe diarrhea, compromised immune system, vitamin deficiencies, poor appetite, or diverticular concerns.</p>		
Liver Resonance		
Lungs Resonance		

Lymphatic System Resonance

The lymphatic system is a complex network of lymphoid organs, lymph nodes, lymph ducts, lymphatic tissues, lymph capillaries and lymph vessels that produce and transport lymph fluid from tissues to the circulatory system. The lymphatic system is a major component of the immune system. The lymphatic system has three interrelated functions: (1) removal of excess fluids from body tissues, (2) absorption of fatty acids and subsequent transport of fat, as chyle, to the circulatory system and, (3) production of immune cells such as lymphocytes (e.g. antibody producing plasma cells) and monocytes.

Unlike the blood system, the lymphatic system is not closed and has no central pump. Lymph movement occurs slowly with low pressure due to peristalsis, valves, and the milking action of skeletal muscles; this depends mainly on the movement of skeletal muscles to squeeze fluid through them, especially near the joints. Tight clothing can restrict this, thus reducing the removal of wastes and allowing them to accumulate. If tissue fluid builds up the tissue will swell; this is called edema. The system collaborates with white blood cells in lymph nodes to protect the body from being infected by cancer cells, fungi, viruses or bacteria. This is known as a secondary circulatory system.

Lymph vessels called lacteals are present in the lining of the gastrointestinal tract, most nutrients are absorbed by the small intestine; however, fats (lipids) are passed on to the lymphatic system, to be transported to the blood circulation via the thoracic duct. As the blood circulates, fluid leaks out into the body tissues; this fluid is important because it carries food to the cells and waste back to the bloodstream. The lymph system is a one-way system, transporting interstitial fluid back to blood.

Symptoms may include: swollen lymph nodes, fluid retention (edema or swelling), recurrent infections, fever, chills, rapid heart beat, or headache.

Parathyroid Gland Resonance

Peripheral Nervous System Resonance

Pineal Gland Resonance

Pituitary Gland Resonance

Reproductive Organs Resonance

Skin Resonance

Small Intestine Resonance

Sphenoid & Ethmoid Sinus Resonance

Spleen Resonance

Stomach Resonance

Teeth Resonance

Thymus Gland Resonance

Thyroid Gland Resonance

The thyroid is one of the largest endocrine glands in the body. This gland is found in the neck just below the laryngeal prominence. The thyroid controls how quickly the body burns energy, makes proteins, and how sensitive the body should be to other hormones. The thyroid participates in these processes by producing thyroid hormones, principally thyroxine (T4) and triiodothyronine (T3). These hormones regulate the rate of metabolism and affect the growth and rate of function of many other systems in the body. Iodine is an essential component of both T3 and T4. The thyroid also produces the hormone calcitonin, which plays a role in calcium homeostasis. The thyroid is controlled by the hypothalamus and pituitary.

Symptoms may include: metabolic issues, cold hands or feet, fatigue, constipation, unable to tolerate cold, dry-coarse skin, sparse-coarse hair, low body temperature, or iodine deficient.

Urinary Tract Resonance
