How predictive analytics is saving children's lives in LA

Despite spending \$80 billion annually on efforts to curb child abuse, nearly 1,500 children in the U.S. will die this year and another 700,000 will suffer harm. Learn about Los Angeles's new approach of using predictive analytics to help child protection agents focus on the kids who truly need help.

Europe is demanding a common smart city platform. Should you too?

What the smart cities initiative really needs is a common platform for technology adoption that can be shared across different cities. At least that's the opinion of several industry leaders in Europe. Read the story to learn what they have in mind and why collaboration is such a big part of what they want to do.

Why Colorado Springs wants to be a cybersecurity hub

Cyber threats are growing in sophistication and frequency, and while the targets we usually hear about are big banks and businesses, cities get their share of attention from hackers too. And cities don't always have the expertise to deal with them. A new National Cyber Intelligence Center may help fill that need.
